1. There are three common ways to traverse a tree. List the order of visiting the nodes and children for each of these traversals:

   pre-order: _________________________
   in-order: _________________________
   post-order: _________________________

2. Give the above traversals of the following tree:

   ![Tree Diagram]

   pre-order: _________________________
   in-order: _________________________
   post-order: _________________________
