

Topic 12:

Sequences and Strings

Sequences & Strings – CSc 144 v1.1 (McCann) – p. 1/21

Sequences

Definition: Sequence [1st Attempt]

Notation:

Example(s):

Sequences & Strings – CSc 144 v1.1 (McCann) – p. 2/21

Rules

Recall:

$$\sum_{i=1}^n 2i$$

Example(s):

Two Notations for Infinite Sequences:

Sequences and Functions

Definition: Sequence [Final Version]

.....

Example(s):

Arithmetic and Geometric Sequences

Definition: Arithmetic Sequence (a.k.a. Arithmetic Progression)

Definition: Geometric Sequence (a.k.a. Geometric Progression)

Example(s):

Sequences & Strings – CSc 144 v1.1 (McCann) – p. 5/21

Arithmetic Series

The sum of the terms of an arithmetic sequence (a.k.a. arithmetic series):

$$s_n = a_1 + \dots + a_n = \frac{1}{2}n(a_1 + a_n)$$

Here's why: First, note that $a_n = a_1 + (n - 1)d$.

Next, here are two expressions for s_n :

$$s_n = a_1 + (a_1 + d) + (a_1 + 2d) + \dots + (a_1 + (n - 1)d)$$

$$s_n = (a_n - (n - 1)d) + (a_n - (n - 2)d) + \dots + (a_n - d) + a_n$$

Sum these expressions, and the d terms cancel, leaving:

$$2s_n = na_1 + na_n, \text{ or } s_n = \frac{1}{2}n(a_1 + a_n).$$

Sequences & Strings – CSc 144 v1.1 (McCann) – p. 6/21

Geometric Series

The sum of the terms of a geometric sequence also has an expression: $s_n = g_1 + \dots + g_n = \frac{g_1(1-r^n)}{1-r}$, assuming that $r \neq 1$. (If $r = 1$, $s_n = n \cdot g_1$.) Here's how to get it:

$$s_n = g_1 + g_1r + g_1r^2 + \dots + g_1r^{n-1}$$

$$r \cdot s_n = g_1r + g_1r^2 + g_1r^3 + \dots + g_1r^n$$

$$s_n - r \cdot s_n = g_1 - g_1r^n$$

$$s_n(1 - r) = g_1(1 - r^n)$$

$$s_n = \frac{g_1(1-r^n)}{1-r}$$

Increasing Sequences

Definition: Increasing Sequence

Definition: Non-Decreasing Sequence

Definition: Strictly Increasing Sequence

Decreasing Sequences

Definition: Decreasing Sequence

Definition: Non-Increasing Sequence

Definition: Strictly Decreasing Sequence

Examples: Increasing/Decreasing Sequences

Subsequences

Definition: Subsequence

.....

.....

Example(s):

Need to Identify a Sequence?

A great resource for sequences:

The Online Encyclopedia of Integer Sequences

(<http://oeis.org/>)

Example(s):

Definition: String

Example(s):

Strings (2 / 2)

Notation:

- Lambda (λ) represents the empty (null) string
- xy means strings x and y are concatenated
- Superscripts denote repetition of concatenation
- $|x|$ represents the length of string x
- A^* is the set of strings that can be formed using elements of an alphabet A .
 - A^* is an infinite set
 - $\lambda \in A^*$

Set Cardinality Revisited (1 / 5)

An observation about set cardinality:

Definition: Finite

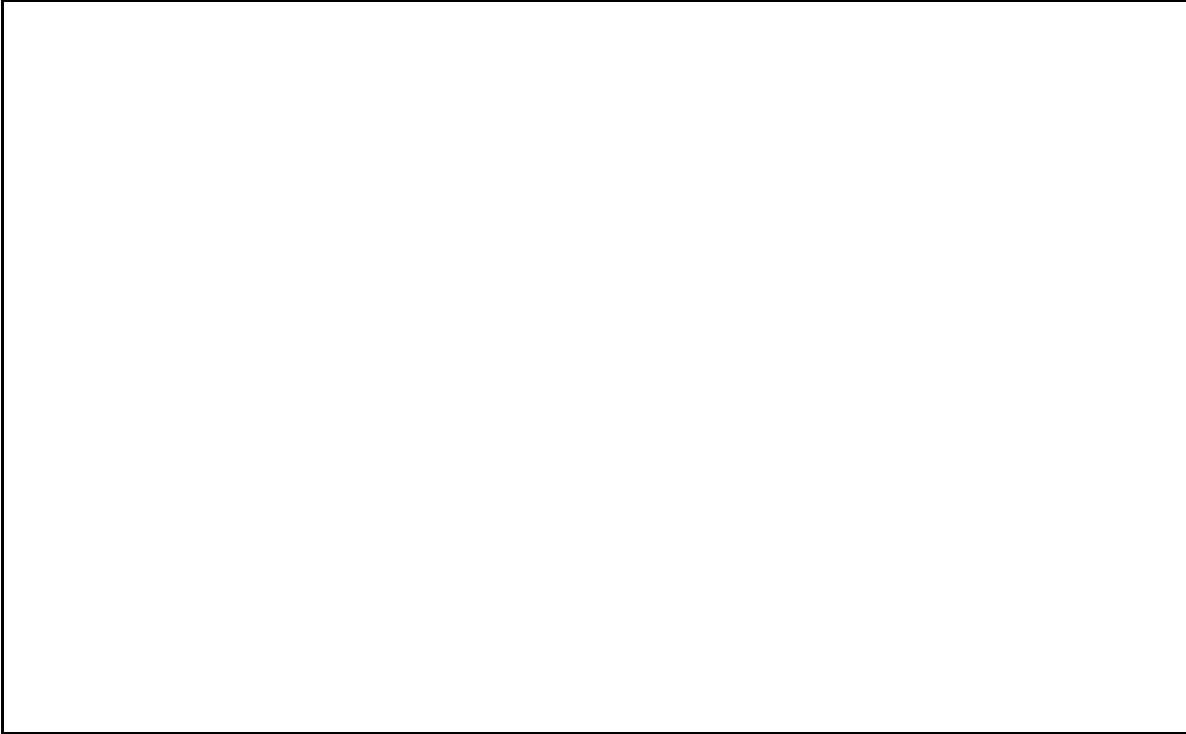

Set Cardinality Revisited (2 / 5)

Definition: Countably Infinite (a.k.a. Denumerably Infinite)

Definition: Countable

Set Cardinality Revisited (3 / 5)

Example(s):

Sequences & Strings – CSc 144 v1.1 (McCann) – p. 17/21

Set Cardinality Revisited (4 / 5)

Question: Are the positive rational numbers countable?

Sequences & Strings – CSc 144 v1.1 (McCann) – p. 18/21

Set Cardinality Revisited (5 / 5)

Conjecture: A pairing function for \mathbb{R} cannot exist.

Sequences & Strings – CSc 144 v1.1 (McCann) – p. 19/21

Now You Can Understand More Cartoons! (1/2)

Background: Elephant jokes became popular form of absurdist humor in the U.S. in the 1960s. For example:

Q: How many elephants can fit in a Jeep?

A: Four – Two in the front and two in the back.

Q: How many bison can fit in a Jeep?

A: None – it's full of elephants.

Q: How do you know when there are two elephants in your closet?

A: You hear giggling when the door is closed.

Q: How do you know when there are three elephants in your closet?

A: You can't close the door.

Q: How do you know when there are four elephants in your closet?

A: There's an empty Jeep in the driveway.

Sequences & Strings – CSc 144 v1.1 (McCann) – p. 20/21

Now You Can Understand More Cartoons! (2/2)

USER FRIENDLY by J.D. "Iliad" Frazer

I HAVE NO IDEA. WHAT?

CANTOR'S DIAGONAL ELEPHANT!! HAHAHAH HAHAHAHAHAHAH HAHAHAHAHAHAH HAHAHAH!!!

IT'S A GOOD JOKE. REALLY. I CAN PROVE IT.

I THINK YOU HAVE A FINE FUTURE AHEAD OF YOU AS A CARTOONIST.
