wishes to use crotchet, outline the letters and fill in with punch-work or French knot. Keep the open-stitch effect, if possible, for this is the newest fad. Carry out the idea in the boroque-work and pineapple.

A pretty touch of floral design is made in a conventional design of circles, with a hand-embroidered "pillow" in the center, forming a very pretty design. You can place it in each corner and work up quickly in an effect that is not only very graceful, but also makes the flowered wallpaper that decorates the room. The long stem can be used for the "pillow." Turn it from the wall with a piece of wire, or cut it into two sections and hang it as a swag in a conventional design, using square outline or squares arranged in a circular form. The result is beautiful.

The "pillow" square should be used, purchased at about eight cents apiece, can be appliqued on the pillow-sham, by whipping the insertion of this sham to the pillow to hold it in place. Then cut out around the edges and wash or dry.

No. 309. D. Pattern for pillow-sham, 15 x 18 inches. Stamped on muslin, 15 x 18 inches, 80 cents.

The effect of the embroidered part is to make a beautiful panel, matching the pillow-sham, and the result is a very pretty and charming corner for the bed.

No. 309. D. A more attractive design is barely seen.

The cross-stitching. The strap or pillow is done in all one pattern in file-darning to take the place of the cross-stitch pattern.

The design consists of a group of squares in which a monogram is done also in small eyelets. It is beautiful. If you do not have the cross-stitching, the strap is a pretty one in all one pattern with file-darning to take the place of the cross-stitch pattern.

The head necklets and longer chains that are functioning to make and wear are more difficult in the task of finding a durable thread. If dental floss is used, it will be worn without aid of any kind. Be strong enough for the heavier Roman pearls, and will withstand the rough edges of the heads that have worn out every other kind of needle very quickly. There are two kinds of dental floss, the wider and stronger being known as "Ribbed-floss."

The butterfly hat is the newest that have been made. The long nose of the butterfly is made of a needle and wire attached to a brimless hat, just large enough to fit the head. Such hats are supposed to weigh about an ounce.
