Emblem Pillow-Cover, “Quartermasters’ Corps”

By MRS. L. M. HIGGASON

USE a thread that will give 4 or 5 spaces to the inch, according to size of pillow wanted, and either white or ecru.

As the bias-cord of the quartermaster’s buff the pillow may be lined with that color. If desired a simple border may be added.

Make a chain of 278 stitches, turn.
1. A treble in 6th stitch (chain 2, miss 2, 1 treble) 90 times; turn, and the 9th space may be made with a chain of 2 stitches, treble in 1st stitch, for 158 spaces; then chain 5, turn, treble in 3d stitch of last chain, and repeat until you have the requisite number of spaces.
2. 3. Ninety-one spaces (chain 5, treble, 8 spaces, 4 trebles, * 1 space, 4 trebles, 3 spaces; work back.
4. Twenty-two spaces, 7 trebles, 4 spaces, 4 trebles, 1 space, 4 trebles, 9 spaces, * 4 trebles, 2 spaces, 7 trebles; work back.
5. Twenty-two spaces, 7 trebles, (2 spaces, 4 trebles, 1 space, 4 trebles, 10 spaces, * 4 trebles, 1 space, 4 trebles, 10 spaces; work back.
6. Twenty-two spaces, 7 trebles, 5 spaces, 4 trebles, 1 space, 4 trebles, 10 spaces, * 4 trebles, 1 space, 4 trebles, 10 spaces; work back.
7. Nine spaces, * 3 spaces, 2 trebles, 1 space, 4 trebles, 8 spaces, (4 trebles, 1 space) twice, 25 trebles, 5 spaces; work back.

Film on Teeth

Is What Discolor—Not the Teeth

All Statements Approved by High Dental Authorities

Millions of Teeth Are Wrecked by It

THAT silny film which you feel with your tongue is the major tooth destroyer. It causes most tooth troubles.

It clings to the teeth and enters crevices. The tooth brush does not end it. The ordinary dentifrice does not dissolve it. So millions find that teeth discolar and decay despite their daily efforts.

The film is what discolors—not the teeth. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. So brushing does not save the tooth if it leaves that film around them.

After years of searching, dental science has found a way to combat film. For daily use it is embodied in a dentifrice called Pepticord.

Your years have been spent in clinical and laboratory tests. Now leading dentists everywhere are urging its constant use. And we supply a 10-Day Tube to anyone who asks. Thus countless homes have now come to employ this scientific dentifrice.

Your Tube Is Waiting

Your 10-Day Tube of Pepticord is waiting. Send the coupon for it. Thus now how clean the teeth feel after using. Mark the absence of the silny film. See how tooth whiten as the fixed film disappears. You will be amazed at these ten-day results.

Pepcident is found on pepcid, the digestant of albumin. The film is albuminous matter. The object of Pepcident is to dissolve it, then to constantly combat it.

But pepcident alone won’t do. It must be activated, and the usual agent is an acid harmful to the teeth. So pepcident long seemed impossible.

Now active pepcident is made possible by a harmless acti-
