turned twills 45/4 46/10 47/10 49/9 50/6 51/10	

We wish to remind you that the above index covers only the years 1958 - 1960. For years 1955 - 1957 there is an index in the MW 36. and for 1951-- 1954 in MW 18.

THE EASIEST WAY OF PRESERVING BACK COPIES OF THE MASTER WEAVER is the following one:

When you receive a new issue, first of all remove the staples with a knife, scissors, or nail file. Punch three holes in each page including the cover with an all purpose paper punch. Four pages can be punched at a time. The holes have a standard distance: 1¼", 5½", and 9¾" from the bottom of the page. Then staple the issue again. For very heavy service use six staples: one immediately below and one immediately above each hole.

The back issues can be then kept in standard, three-hole loose leaf binders, 12 issues or two years to a binder. They will last practically for ever.
