

CONTENTS.

CHAPTER I.

	PAGE
§ 1. Light and Colour Sensations	2
§ 2. Light Waves	4
§ 3. Colour Vision	5
§ 4. Eye Structure	6
§ 5. Retina. Yellow Spot. Blind Spot	8
§ 6. Humours	10
§ 7. Pupil. Iris. Optic Nerve	12
§ 8. Perception of Colour	13
§ 9. Primary Colour Sensations	14
§ 10. Complementary Colours	16
§ 11. Colour Sensation Curves	17

CHAPTER II.

§ 12. Daylight Standard	19
§ 13. Pure Daylight	20
§ 14. Sunshine during Year	20
§ 15. Diffused Daylight	22
§ 16. Direct Sunlight	26
§ 17. Reflected Blue Skylight	28
§ 18. Interference of Light	31
§ 19. Selection of a Pure Light	33
§ 20. Greenish Reflected Light	33
§ 21. Surroundings (Interior and Exterior) of Colour-Matching Laboratory	34
§ 22. Rosy Morning Light	34
§ 23. Variability of Daylight	36

CHAPTER III.

	PAGE
§ 24. Hue	37
§ 25. Matching of Hues	38
§ 26. Luminosity of Colours	38
§ 27. Purity of Colours	39
§ 28. Examining Purity of Colours	40
§ 29. Examining Bright Colours	41
§ 30. Aid of Green-tinted Films for Bright Colours	42
§ 31. Simultaneous Contrast	44
§ 32. Matching Difficulties arising from Contrast	46

CHAPTER IV.

§ 33. Reflected Light. Examination of Colours	50
§ 34. Effect of Lustre and Transparency of Fibres	52
§ 35. Transmitted Light Examination	53
§ 36. Nature of Dyestuffs observed by "Overhand" Method	55

CHAPTER V.

§ 37. Colour-modifying Influences in Dyed Textiles	59
§ 38. Effect of Lustre and Transparency	59
§ 39. Velvet Pile Surface Matching	65
§ 40. Optical Properties of Dyestuffs	66
§ 41. Dichroism	67
§ 42. Fluorescence	70

CHAPTER VI.

§ 43. Use of Tinted Mediums in Colour-Matching	73
§ 44. The Orange-tinted Film	75
§ 45. Tinted Mediums in Examination of Gems	75
§ 46. Defects of the Eye	76
§ 47. Yellowing of the Lens	77
§ 48. Colour-Blindness	79
§ 49. Artificial Colour-Blindness	81
§ 50. Peculiar Faculty of Dichromic Vision	82

CONTENTS.

ix

CHAPTER VII.

	PAGE
§ 51. Matching of Silk Trimmings, Linings, etc.	84
§ 52. Behaviour of Shades in Gaslight	86
§ 53. Colour-Matching of Old Fabrics	88
§ 54. Matching of Shades produced by Mixing Bright Dyes	90
§ 55. Changing of Compound Shades on Exposure to Sunlight	90

CHAPTER VIII.

§ 56. Aspect of Colours in Artificial Light	92
§ 57. Electric Arc Light	96
§ 58. Magnesium Light	99
§ 59. Dufton-Gardner Patent Light	100
§ 60. Welsbach Lights	101
§ 61. Acetylene Gaslight	102
§ 62. Ordinary Yellow Illuminants	105
§ 63. Testing the Colour-Matching Qualities of an Illuminant	109

CHAPTER IX.

§ 64. Studies on the Influence of the Absorption Spectrum in the Changes of Hue under Artificial Light. Spectra of two Sages	111
§ 65. Absorption Spectra of two Slate Blues	115
§ 66. Absorption Spectra of Plum Drabs	117
§ 67. Abnormal Modifications of Hue under Yellow Illuminants like Gas and Lamplight	120
§ 68. Unreliable Dyestuffs	121

APPENDIX.

Four Plates, having fourteen dyed specimens illustrating the text.

INDEX	125
