CONTENTS

BOOK I.

CHAPTER ONE.

No.  Page.
1. Ends and picks. ............................. 3
2. Textile designing paper. ................. 3
3. The foundation weaves. ................... 4
4. The plain weave. .......................... 4
5. The twill weaves. .......................... 5
6. Regular satin weaves. ..................... 7

CHAPTER TWO.

Fancy Effects in Plain Weave Fabrics and Those Derived from the Plain Weave.... 10—17
7. Plain weave fabrics figured by means of coarse and fine yarn .................. 10
8. Plain weave fabrics figured by means of two or more colors in warp and filling 10
9. Rib weaves ................................ 12
10. Figured rib weaves .......................... 14
11. Oblique rib weaves .......................... 15
12. Basket weaves ................................ 16
13. Figured plain weaves ........................ 17

CHAPTER THREE.

Fancy Effects in Twill Weaves, Drafting, and Weaves Derived from the Regular Twills 18—41
14. Figured effects produced by means of two or more colors in warp and filling ..., 18
15. Drafting ................................... 19
16. Broken twills ................................. 24
17. Figured broken twills ...................... 26
18. Skip twills .................................. 26
19. Fancy skip twills ............................ 28
20. Diagonal twills .............................. 28
21. Reclining twills ............................ 31
22. Curved twills ................................ 33
23. Pointed twills ............................... 33
24. Figured pointed twills ..................... 34
25. Double twill effects ........................ 34
26. Fancy twill effects .......................... 35
27. Entwining twills ............................ 36
28. Fancy twills produced on the entwining twill principle ......................... 37
29. Corkscrew weaves ........................... 38
30. Figured corkscrew weaves .................. 40

CHAPTER FOUR.

Weaves Derived from the Satin Weaves ................................. 42—46
31. Double satins ................................ 42
32. Granite weaves ............................. 43
33. Clear breaks in satin weaves ................ 44
34. Shaded satins ............................... 45
Chapter Five.

Weaves for Fabrics Constructed with two Warps and one Filling \(\text{47—51}\)

- An extra warp for weight \(\text{47}\)
- An extra warp for figure \(\text{49}\)
- Lappet and swivel weaving \(\text{50}\)

Chapter Six.

Weaves for Fabrics Constructed with One Warp and Two Fillings \(\text{52—58}\)

- An extra filling for weight \(\text{52}\)
- An extra filling for figure \(\text{53}\)
- Coin spots \(\text{54}\)
- Rib fabrics produced by means of two fillings and one warp \(\text{54}\)
- Figured beavers \(\text{57}\)

Chapter Seven.

Double Cloths \(\text{59—75}\)

- The principle and construction of double cloths \(\text{59}\)
- Double plain weaves \(\text{63}\)
- Twill weaves \(\text{66}\)
- Combination of single and double plains \(\text{67}\)
- Matelasse weaves \(\text{67}\)
- Pointed weaves \(\text{69}\)
- Marseilles weaves \(\text{70}\)
- Crepons \(\text{70}\)
- Weaves for beavers, kerseys and meltons \(\text{72}\)
- Chinchlillas \(\text{73}\)

Chapter Eight.

Single and Double Cloth Weaves for Fabrics of a Special Construction \(\text{76—88}\)

- Through-and-through weaves \(\text{76}\)
- Bracket weaves \(\text{77}\)
- Weaves for towelings \(\text{78}\)
- Imitation gauze \(\text{79}\)
- Honeycomb weaves \(\text{80}\)
- Gauze \(\text{80}\)

Chapter Nine.

Triple and More Ply Cloths \(\text{89—92}\)

- Triple cloths \(\text{89}\)
- Figured triple cloths \(\text{92}\)

Chapter Ten.

Pile Fabrics \(\text{93—99}\)

- Corduroys \(\text{93}\)
- Velveteens \(\text{94}\)
- Chenille \(\text{94}\)
- Warp pile fabrics \(\text{95}\)

</table>

### Chapter Two.

*Equivalent Counts, Ply Yarns, and Their Single Equivalents.* 7—15

8. To find the equivalent count in other materials ............... 7
9. To find the single equivalent count of two and more ply threads made of minor threads of the same count and material ......................................................... 8
10. Ply yarns in Spun Silk ........................................... 8
11. Equivalents of compound threads composed of minor threads of different counts, of the same material .............................................................. 9
12. Equivalents of compound threads composed of two minor threads of different counts and materials .................... 9
13. Three ply threads of different counts of the same material .......................................................... 10
14. Three ply threads of different counts and of different materials ........................................ 11
15. Four and more ply threads of different counts and of different materials ........................................ 12
16. To find count of required minor threads in same material as that of the given minor and the desired compound thread . 14
17. To find the count of the required minor thread in another material from the given minor thread ..................... 14

### Chapter Three.

*Grading of Raw Silk Yarns.* 16—20

18. Dram System .................................................... 16
19. To find the number of yards per pound of dram silks ........ 16
20. To find the number of yards per ounce of any dram silk ...... 17
21. To find the equivalent of dram silk in other systems ........ 17
22. To find the equivalent in dram silk of other yarns .......... 17
23. Denier System .................................................. 18
24. Number of yards per pound of denier silks .................. 18
25. Number of yards per ounce of denier silks .................. 18
26. Equivalent counts in the denier system to those in the dram system ..................................................... 19
27. Equivalent counts in the dram system to those in the denier system ..................................................... 19
28. Equivalent counts in other systems to those of the denier system ..................................................... 19
29. Equivalent counts in the denier system to those of other systems ..................................................... 20

### Chapter Four.

*Calculations Pertaining to Cloth Analysis.* 21—27

30. Samples ....................................................... 21
31. The take-up in weaving ....................................... 21
32. The total number of yards of warp per yard of cloth ........ 22
33. The total number of yards of filling per yard of cloth ...... 23
34. The total number of yards, of the various yarns used ...... 24
35. Another method of finding the total number of each kind of warp yarn used per yard of cloth................. 25
36. To find the count of any yarn from a small sample.......................... 26
37. To find the weight of one yard of cloth, in ounces, from a small sample........................................... 27

Chapter Five.

Analysis of Cloth.............................................. 28—32
38. Points to be looked for when analysing a textile fabric.............. 28
38a. Explanation of points 1, 2 and 3 .................................. 29
39. Explanation of points 4 to 8, inclusive................................. 30
40. Explanation of points 9, 10 and 11.................................... 31
41. Explanation of points 12, 13 and 14.................................... 31

Chapter Six.

Warp Calculation.................................................. 33—40
42. Preparing the warp.................................................. 33
43. To find the number of ends in the warp ................................ 33
44. The pattern.................................................................. 34
45. To find the number of patterns in the warp............................ 35
46. To find the total number of ends of each color in warp.............. 36
47. To find the number of yards of warp yarn required.................. 37
48. To find the number of yards of each color, or kind, of yarn required ........................................................................ 38
49. To find the weight of warp in ounces or pounds....................... 38
50. To find the count of warp yarn required................................. 40
51. To find the number of ends required in warp........................... 40
52. To find the required length of warp...................................... 40

Chapter Seven.

Filling Calculations.................................................... 41—44
53. The Filling................................................................... 41
54. To find the number of pounds of filling required...................... 41
55. To find the number of ounces of filling required...................... 42
56. To find the required number of picks per inch......................... 43
57. To find the number of yards of cloth that can be woven............. 44
58. To find the required count of the filling................................. 44

Chapter Eight.

The Selvage, Take-Up of Warp during Weaving, Waste of Warp and Filling during Weaving............................. 45—47
59. The Selvage.................................................................. 45
60. To find the length of fabric from loom................................. 46
61. Waste of warp and filling during weaving............................. 46

Chapter Nine.

Examples Illustrating the Calculations for Finding the Cost........ 48—58
62. Blue Serge Suiting...................................................... 48
63. Cotton Sheeting................................................................ 49
64. Cassimere Suiting....................................................... 50
65. Fancy Worsted Dress Goods............................................. 52
66. Electric Tape............................................................ 55
67. Kersey Overcoating..................................................... 57

Chapter Ten.

The Diameter of Threads............................................... 59—62
68. The diameter of threads.................................................. 59
69. The number of ends and picks per inches, including the interlacing................................................................. 59
70. When the warp and filling are of different counts.................. 61
