Title Translation: The Austrian Domestic Lacemaking Industry, including a Paper  
on the Policies of Domestic Industry

Review:

This small book gives an overview of lace making in Austria at the turn of the century (1907). It includes a history of the development of the domestic lace industry, bobbin lace in commercial production both by hand and machine, salaries and living conditions of workers, state lace schools, and a critical examination of an inquiry into the industry with input from merchants and others concerned.
