

Handleiding voor Vrommwelijke HandWerkenddoor de Redaction Vol 12 (Instructions for Women's Handwork); from the publication "La Gracieuse"; in Dutch; no date; Pub. A. W. Sijhoff, Leiden.

The second of two little books on beginning bobbin lacemaking, this one continues with more simple designs. As with the first, all prickings are included in the text at the correct size for working. In this volume, however, a large insert containing extra prickings was glued to the back cover. This is included here, with instructions for enlarging to the actual measurements.
