PRICE, 10 CENTS.

March,

1899.
LACE
Ancient and Modern.
By EMILY RAYNER.

Honiton and Battenburg lace braid work has now become a perfect rage. It is used for dress trimmings, fancy neckwear, hat crowns and various other dress accessories. Also for bureau and buffet scarfs, centre pieces, doilies, tidies, curtains and many other household decorations. It is little wonder that the beautiful work is pleasing. All its component parts are so perfect that it is only a pleasure to form with the imported braid, the dainty filmy lace. It is also a satisfaction to have real hand-made lace articles, in one's home, instead of the stiff machine woven goods that otherwise would take their place. This hand-made lace braid work has a character which no machine can supply; the very evenness and flatness of machine lace makes it of little value from an artistic point of view.

Saxony Laces

The making of pillow laces in Saxony dates from the 16th Century, the Art having been introduced from Flanders. There are many beautiful legends on the origin of lace, but the prettiest of all reveals the introduction of lace into Germany, and the invention of the pillow and the bone. This legend was lately republished in the New York Tribune by Mrs. Cynthia Westover Alden the talented Editor of its ‘woman’s page’ It is here inserted:—

"In the middle of the sixteenth century there lived in the Saxon Erzeberg a noble lady, Barbara Uttermann, the wife of a rich mine-owner of the district. By birth she belonged to the distinguished Eiterlein family of Nuremberg, The heart of the good woman was devoted to the interests of the poor of this
rough, barren, mountain region, where lay her husband's property, who were reduced at this time to great straits by the decline of the mining business, which had furnished their chief support. The culture of the sterile soil was wasted, and utter hopeless poverty was creeping over the once thriving community. In this state of things the kind soul of Barbara was incessantly revolving plans for the relief of these wretched people.

"One day, accidentally entering an old shaft which had been recently re-opened, her eye was caught by a long stretch of ancient spider webs, of most complex, fantastic patterns glimmering against the moist wall in the early sunlight. An inventive thought fell like an inward ray into the brain of this daughter of Nuremberg. With prophetic eye of taste, she saw in the delicate product of the insect weaver the suggestion of a charming addition to the cumbrous richness of a Mediaeval attire, and already beheld in fancy the airy web covering the gorgeous brocades in which the patricians families of her native place loved to array their goodly persons.

"'Why cannot human hands,' thought she, 'do what the spider's hands have done?' Day after day she returned to the old shaft to study the work of her little teacher, and then experimented at home. The result in time was the pillow and bone, the simple instruments not yet supplanted by modern improvement for making lace by hand. Specimens were sent to fairs; she taught the art to village maidens; the novelty caught the public taste and spread into other countries, and at this time it gives employment in that district alone to more than thirty thousand people.

"Fifty years since the grateful inhabitants erected in the churchyard of Annaberg, where Barbara Utterman was buried, a monument to her memory. It represents her as sitting, the pillow (or cushion) on her lap, while an angel crowns her with a garland, and bears the inscription:

"'In the year 1561 she became, through the invention of lace-making, the benefactress of Erzeberg.'"
Good Patterns Necessary.

The lines of the design are easily followed with the braids and a few lessons from a competent teacher, if one is at hand, or a few hours study of a reliable lace pattern book, showing all the details of the work, will teach one the plain and fancy stitches that gives the soft rich antique lace effect so greatly admired. You will be interested in noting how nearly the process of this lace making, follows the method of the rare old laces described elsewhere in this article. Only the modern lace worker is fortunate in having her lace materials already prepared. She is not forced to vex her soul and ruin her eyes by spinning her thread, plaiting her ground work, or weaving her patterns. The thread of Antique laces were of remarkable fineness and were spun in dark damp cellars since contact with dry air caused it to break. The spinner was allowed but a single ray of light and was guided chiefly by her touch, and stopped her wheel whenever her wonderfully sensitive fingers felt the slightest unevenness. Because the number of these expert spinners were small, and their work so tedious and unhealthful, the real Brussels thread with which Brussels lace is made was very expensive, costing from $500 to $1,200 per pound. Much of the fine pillow lace is also made in cellars, as the damp air is better for the exceedingly fine thread.

(\textit{Thread is much cheaper now.})

Lace Thread.

The term is applied indifferently to all laces made with flax thread to distinguish them from laces made with gold and silver or cotton threads, whether of the pillow or needle. Laces made with flax are much superior to those of cotton, as the latter stiffens and becomes thick when cleaned, while the former always retains its flexibility and clearness. Much of the beauty of the lace depends upon the fineness of the thread, and its superior quality.
Honiton lace thread, until a recent period was obtained from Antwerp and frequently cost £2.40 a pound.

Modern Honiton and Battenburg Lace.

The very sight of it suggests a happy woman, pleasant home surroundings, or gay hotel life, a dainty work basket, and nothing but content. The patterns, lace braids, and C. & C. lace thread, have all been sent from a professional and practical lace maker's establishment, and there is no care, no strain upon the eyes or nerves, and only the result of a beautiful filmy piece of lace, which any woman may be proud to acknowledge as her own handwork.

Lace Pattern Books.

An idea of the antiquity of hand wrought lace may be formed, when it is known that the earliest lace pattern books extant, date from the 16th Century. They are extremely rare, and have been nearly worn out by the usage and are now only preserved as rare and valuable literary curiosities. The oldest one with which the writer is familiar is a collection of lace and knitting patterns, published in 1597 just three hundred years ago. There is another, however, that bears date nearly one hundred years earlier. As pattern books were then expensive and easily damaged it was usual for ladies to preserve designs and stitches by working lace-samples, which are still kept as heirlooms in many families.

Instructions.—How to Begin.

FIRST—Baste the braid material on the pattern, folding the curve carefully and joining as seldom as possible.

Don't be discouraged if it pulls a little: then overcast the edge and draw the inside edge of the braid down flat, being sure to put the needle through the holes at the edge so as not to draw the work and sew finely when it lays on the corners.

The first stitch is a folded leaf. (See Fig. 1.) It is made by starting from the bottom of the leaf and catching the thread at the top, then putting the needle over several times forming a sort of a twist at the bottom of the place where you began the vein, the veining is made in the same way. Be sure to put the needle between the two threads which run lengthwise. (Fig. 2.) is a sort of wheel stitch. Begin by joining across the circle and back again, as described above, stopping at the last thread in the centre and putting the needle under the thread back of it and over the one in front several rows all around the centre of the wheel by working with the back of the needle is easier for some, it certainly prevents catching the needle in the braid.
Modern Lace Stitches.

No.
1—Buttonhole Stitch
   Shows the method for working it. This simple lace stitch consists of the buttonhole-stitch worked in lines forward and backwards.

2—Buttonhole Net Stitch
   This stitch consists of the buttonhole-stitch worked in lines forward and backwards, so that when completed it will form a net work.

3—Italian Net Stitch
   Represents the same stitch as No. 2, but worked much finer, and care must be taken to get it exactly even or it will not look well.

4—Point de Bruxelles
   Gives a pattern of a leaf which is worked by first making the buttonhole-stitch and then filling up with a cross stitch.

5—Antwerp Stitch
   Is made by first making the buttonhole-stitch, and in returning the thread is twisted through the buttonhole-stitch and is enclosed by the fresh buttonhole-stitch.

6—Point d'Anvers Stitch
   Is formed by first making the buttonhole-stitch, and in returning the thread is twisted through the buttonhole-stitch and is enclosed by two fresh buttonhole stitches in one space and four in the next, and repeat.

7 and 8—Point de Sorrento
   These stitches are made by making two buttonhole-stitches, worked close together. Figure No. 8 shows the method for making it. No. 7 shows the effect when finished.

9, 10 and 11—Point de Venice
   These effective stitches are made by making a buttonhole-loop as a footing and then a second loop into it shown in figure 10. No. 9 is made like No. 10, having two buttonhole-loops, and No. 11 is made with three buttonhole-loops.

12—Buttonhole Stitch Backwards
   Gives a pattern in which a common buttonhole-stitch is made as a kind of footing and then by looping four stitches into the first large buttonhole-stitch which makes a thick scallop.

13—Twisted Bar
   Is formed by making a single cross-stitch, and looks like a fine herringbone-stitch. It is used in narrow spaces, and is worked into the braid.

14—Double Twisted Bar
   For this stitch make a double cross stitch, consisting of two lines, lying one over the other.

15—Point d'Alecon
   Represents the double cross-stitch, consisting of two lines, lying over each other, and fastened by a buttonhole, made across it.
No.

16—**Twisted Point d’Alecon**
   Is formed by making the herringbone-stitch twisted several times.

17—**Festoon Point d’Esprit**
   The simple buttonhole-stitches are looped for festoons into each other.

18—**Buttonhole-Stitch Bar**
   Is made by stretching at least three threads across, and worked over very closely with the buttonhole-stitch.

19—**Picot Bar**
   Put the needle through the last buttonhole-loop, and twist the thread several times, and fasten by putting the needle through which forms picot.

20—**Point D’Espagne**
   Is made by making the buttonhole-stitch and at the same time wind the thread round by putting the needle through several times.

21—**Bar Rosette**
   This rosette has a pretty effect in joining and is the simple spider web stitch.

22—**English Stitch**
   The threads are stretched first in one direction, then plaited through in the opposite direction, and finished with spider web.

23—**Spinning Wheel**
   First make foundation threads as for plain wheel, then proceed to make centre by passing the needle backward over one thread and forwards under two threads.

24—**Lace Border**
   Is composed of stitches No. 12, 21 and 23.

25—**Point D’Angleterre**
   This effective stitch is used particularly for filling in leaves.

26—**English Web Stitch**
   The threads are stretched first in one direction then plaited through in the opposite direction, then make one row of slanting threads. The second slanting thread is placed in the working of the wheels.

27—**Irish Stitch**
   First work the horizontal threads, and over these weave in the two diagonal threads crossing each other, and forming regular slanting squares which are filled up with the darning stitch.

28—**Trefoile**
   Shows how the different stitches may be utilized. This leaf is composed of stitches 18, 12, 20 and 21.
Point de Bruxelles
No. 51. (FORWARD)
"The French name for Brussels Lace"

This is formed with successive rows of Buttonholes.

To work:—Comence on the right hand of the space in a corner, and make a loop across the work, return by making a loose Buttonhole into the first loop and so form two loops. For each row, fill every loop of the previous row with loose Buttonholes.

Net or Brussels Stitch
No. 52. (BACKWARD.)

Shows the same stitch worked back from left to right. You will find this quite essential in many cases where leaves are to be formed to come together in opposite directions to form the shape and not to have the same slant.

Point de Gibeciere
No. 53.

This is a long and a short buttonhole stitch, made in one, two and three rows of the Brussels stitch, made to form different widths of spaces. In the third row a cross line of thread is fastened to work the short and the long buttonhole over to form different length loops to be connected by the next row, and a drooping space to form an irregular effect.

Point de Venise
No. 54.

Commence to work from left to right, and work one loose Buttonhole stitch. Into this work four close Buttonhole Stitches, then make a loose stitch and work four close stitches into it. Second row: work a Buttonhole stitch into each loop. Repeat these two rows alternately to end of space.
Buttonhole Stitch
No. 55. (Barred and Drooping.)

This stitch shows the Brussels net stitch, worked over cross threads in uniform measure, in 4 rows and then a long drooping buttonhole-stitch connected by 2 short buttonhole-stitches in the same form as in No. 53. The third section to be filled the same as the first, uniform, having the irregular effect in the centre.

Spotted Lattice Stitch
No. 56. OR FESTON DE POINT.

This stitch is made with Point de Bruxelles Loops, secured by being knotted at every loop. First row, make a Point de Bruxelles loop across the extreme point of the space. Second row, fasten the thread a little lower down than the first loop into the edge of the lace and make a Point de Bruxelles loop into the first made one, draw it up and then across the buttonhole that it forms a tight buttonhole.

Point d'Espagne
No. 57.

To work: — Commence the first row from right to left, and keep thread turned to the right, put the needle into the edge of lace and bring it out, inside the loop made by the thread. Draw it up rather loosely, and pass the needle again under the stitch, fasten to the lace at the end of the row.

Point De Milan, or point Feston
No. 58.

This stitch is made with Point de Bruxelles Loops, secured by being knotted at every loop, in the same order as No. 56 only in the opposite direction.
Knotted Point Feston

No. 59.

This stitch is made of the Point de Bruxelles loop knotted over twice, and then through the upper thread in the same form as in No. 54. Draw the V not tight.

Beaded Net

No. 60.

This stitch is comparatively new, and not found among the modern lace stitches. When well worked it has the appearance of Mecrame Knots on a square Mesh Net. It is worked the same as No. 52, only instead of one buttonhole, you pass the needle around the thread three times, and then through all the loops to form a tight firm knot.

Point d’Angleterre or Open English Lace

No. 61.

Fill up the space with single threads at an equal and short distance apart and in one direction. Then cross the threads in the opposite direction, and pass the needle over and under the lines alternately. Fasten the last thread well to the edge and twist over with the needle to where the first lines cross. Work around the cross about six or eight times and pass the needle over and under to make a spot. Twist again over the thread to the next cross and repeat as before.

Point d’Anvers

No. 62.

This stitch is worked with a thread being drawn through a line of buttonhole stitches, giving it the appearance of Antwerp lace, and known to many ladies as Point de Sorrento or Point de Malines.
Barcelona Lace

No. 63.

Work 4 Buttonhole stitches close together, then miss the space that would take 4 more, and make 4 others, leaving a loop between the close stitches, continue until the end of the row. Second row: work 3 Buttonholes into the loops left in the last row and make loops under the close work of that row. These 2 rows worked alternately form the lace.

Point de Valenciennes

No. 64.

To work:—First row: work one long and one short Point de Brussels stitch to the end of the row. Second row: into the long stitch work nine close Buttonhole stitches, miss over the short stitch, and work nine close Buttonhole stitches, into the next long stitch. Third row: work five Buttonhole stitches in the nine of the last row, and two into the short Buttonhole stitch. Fourth row: work two Buttonholes into the five stitches, and five over the two Buttonhole stitches and repeat to the end of row. Fifth row: work nine Buttonholes over the five stitches, miss over the two Buttonhole stitches, and work nine Buttonholes over the next five stitches and repeat. Seventh row: commence like the fourth row and continue the rows until the space is filled.

Point de Brabancon

No. 65.

Commence at the left side. First row: work one long and one small buttonhole stitch in succession to end of the row, and fasten to lace. Second row: work 7 close buttonhole stitches into the long, and two loose stitches into the small loops, repeat the rows alternately.
LACE STITCHES
TAUGHT BY MAIL.
EACH 25 CENTS.
Six different stitches, - $1.00

Each stitch is worked on green muslin 2 inches square, giving the outline how to form it and how it is worked. You will find this a good guide to help you.

---

**WARNING.**

We do not keep cheap COTTON BRAIDS. We import only the best.

Three-quarters of the braid that is sold to-day is all or part cotton and will not pay for the work that you put with it, as it will shrink in washing.
