TAWIDO

TRADE MARK REGISTERED U. S. PAT. OFFICE

Mfg. by TAWIDO STUDIO
96 FIFTH AVE., NEW YORK

For orders and information, address
ELNA M. De NEERGAARD

NOTICE:

PATENTS HAVE BEEN APPLIED FOR COVERING ALL TAWIDO LOOMS AND SHUTTLES, AND ANY INFRINGEMENTS THEREOF WILL BE DULY NOTED.

THE TAWIDO LOOMS

are designed to meet the especial needs of hospitals, schools and homes, and with the simplified construction, are extremely easy to put together and to operate.

The Tawido Looms all sizes are in use in U. S. Army Hospitals, sanitariums for nervous and tubercular patients, state hospitals for crippled children, art schools, and training schools for occupational teachers.

The A and B models are both 4 treadle looms, and weave any 4 heddle patterns without the "lams" hitherto always used in any pattern weaving, wires fitted tight round exact center of each lower heddlestick, are attached to each of the treadles as the weaving pattern requires.

Tawido Loom, Model C is a combination of bedside, table and child's loom and is operated entirely by lifting and lowering the reed frame, which, when the web is put through the shed, drives the threads in the web together.

As a bedside loom it is placed across the patient sitting up, and the height of the loom can be adjusted for the convenience of the weaver.

For use as a table loom, just remove the stand. Placed on the floor the height is very convenient for the work of children from 7 years up.

Directions for warping and threading are sent with each loom if desired.

TAWIDO LOOM—MODEL "A"

Floor space 24x30 in. Weaves 20 inches.
