ion for joining).

Con in this way until you come to the last r of one rose. Then do a ch of 3 ds joining into the p of 1st free r of centre rose; make two more ch similar to the others.

Then start joining into the next 6 of the rings thus:

Ch: 3 ds, 2 p sep by 3 ds, 3 ds. then continue working right round other side similar to the other, taking care to join the last p of last ch to 1st one made.

EDGING.—Use 2 threads and commence by joining the thread to the 2nd p of 5th ch, counting from outer edge and ch 5 ds.

R: 2 ds, join to p of ch just above the one just used, 2 ds, fairly long p, 2 ds, fairly long p, 2 ds close. Ch: 5 ds.

R: 2 ds, join to last p of last 4, 2 ds fairly long p, 2 ds, fairly long p, 2 ds close. Ch: 5 ds.

Con right round hankie, joining similarly as other side.

2nd ROW OF EDGING: First join in p of ch where the 1st ch is joined and ch: 7 ds, join into base of 4 (between the last chains), 7 ds, join into next, and so on right round hankie.

Designed by Rachel Abraham (Q).

NEEDLEPOINT LACE SAMPLER

Mrs. Mildred Rezabek, of Barnesville, Ohio used ninety-five different button hole stitches in the making of this design. The background work was completed with size 100 thread. Enjoy the story of her Bank Museum on page 64.
A Tribute To Mary Ferrier

This is a tribute to the late Betty Ferrier of Kamloops, B. C., Canada, who passed away just before the 1981 I.O.L. Convention that she so wanted to attend.

However, her bobbins will not remain idle as both her daughter and son-in-law (Mr. and Mrs. Edgar) have taken up her bobbins. Mr. Edgar is a paraplegic.

Since September 14, 1981 with the aid of Doris Southard's book, Mrs. Edgar had forged ahead rapidly and has completed a "Spider Parade" pattern, while husband John has made 40 inches of the Triangle pattern—an extra ordinary fete for only two months of bobbin lacemaking.

Spider Parade

John speaks of his mother-in-law as the Hon. M.I.L., which translated means Honourable Mother-In-Law.

Both of them are planning to attend the I.O.L. Inc. convention in Vancouver and I hope everyone will encourage them in their future endeavours of lacemaking.

Muriel Mitchell
B.C. Canada

You can Bank on it

LACE BECOMES A VALUABLE DEPOSIT

The old Belmont National Bank though no longer a stronghold for money, will become the keeper of valuables of another kind. The former bank will feature Mrs. Rezabek's private lace collection, some of which dates back to the 1700s, as well as antique lace-making tools of ivory and bone and vintage clothing of bygone days.

Plans call for the museum to be open Sundays, Thursday and all legal holidays from 1 to 5 p.m. and by appointment.

According to Mrs. Rezabek's daughter, Jo Ann, her mother has always wanted to display the lace collection, and they have been searching for an appropriate place for a long time. The old bank is "not a typical bank," and the perfect place, she said.

The front room has a floor of individually-laid black and white tiles. The walls are paneled in oak and the ceiling is embossed tin. A fireplace and large windows of colorful leaded glass highlight the room.

The bank vault is almost elegant, the interior featuring a floral pattern etched in steel.

The back room also has leaded glass windows, and the walls bookcases and stairways are in rich woods.

Since the beginning of the year Jo Ann has spent her spare time washing down walls, painting and cleaning the woodwork in the two large rooms, which will be used for displays. In addition to the regular exhibits, a children's corner is being planned. And, Jo Ann said the bank vault may feature an exhibit of special interest to the male visitors.

The displays will be changed from time to time and the museum welcomes donations or exhibits from the community that fit the textile theme.

Hopefully, the museum will enable young people to see the beautiful clothing and articles of past generations, and the elderly can "come to reminisce" Jo Ann said.
The Rezabeks noted that they received help, guidance and encouragement from area residents connected with the Belmont County Museum located in Barnesville of which Mrs. Rezabek is one of the founders and a member of the board of directors. Consulting on historical information and pictures accompanying the displays was Richard Thompson, and Naomi Wickens of Lowell donated lace and needlework tools.

Mrs. Rezabek has edited a book entitled "Point de Venice," which discusses and illustrates the techniques stitches and designs of needlepoint lace. It also includes instructions for making intricate and delicate lace for tablecloths, collars and even lampshades.

According to Jo Ann, "there are some lace museums, but nothing as extensive as ours to incorporating other textiles and exhibits."

---

**Charter Designer Named**

The designer of the International Old Lacers, Inc. Charter, which was featured on the November Bulletin cover is the artist, Honeya Barth, Palos Verdes, Ca.

Officers and members of I.O.L. wish to express their gratitude for her expertise which she contributed without a fee. Its beauty is an expression of the true meaning of the I.O.L. organization.

---

**Director On TV**

Diane Carrier, the International Old Lacers, Inc. Director for Eastern Canada made a twenty minute program on a C.B.C. (French) station. She spoke on Lace, and advertised I.O.L., and the upcoming convention in Vancouver, Canada.

The program will be telecast in April, and will be seen from Halifax to Vancouver.
Old Lace

Lace making requires painstaking artistry on a scale so delicate only a devoted worker will persevere.

A corner detail of Gros Point needle lace. Photo by Seattle Times

Elaine Holmquist is lace crazy. Elaine collects anything to do with lace, including plants. She has a shadowlace fern, a Chantilly Echiveria and a black-lace cactus whose Latin name is ec-chenocerus Reichenbacheli—especially significant in her view, as her married name was Reichenbach. (She went back to her maiden name after her divorce.)

Her home is crowded with odes of lace projects. Her daughters make lacy, colorful designs with a Spirograph.

Most of all, she collects lace. A bit of Valenciennes lace she prizes would be impossible to reproduce, the flax plant from which it began having become very extinct.

A sample of delicate Gros Point is similarly impossible to re-create, "because you can't get the threads to make it this fine." An old Italian collar from the late 1800s or early 1900s has three-dimensional designs, including narcissus, roses, irises and Acantha leaves. Ireland is represented in her collection with a frothy, cream-colored gauze square of carrickmacross, called a "pseudo lace" because of its uncommon, cutaway gauze construction. Only a few women in the world are left to replicate this special minuscule stitching, Elaine adds.

Helene Hedwall of Bellevue belongs to International Old Lacers. Mrs. Hedwall observes that with the death of the agrarian economy and traditional family activities, lace no longer is passed down from mother to daughter. She looks to lace organizations such as her own, which numbers 1,800 members, to perpetuate the art.

For Mrs. Hedwall, the joy of lace is in the weaving: "It's very soothing to work on. It's just like therapy. To watch this evolve as I'm doing it is very rewarding," says Mrs. Hedwall, who was introduced to the hobby 12 years ago.

Elaine is challenged by the conception and execution of a pattern, likening it to engineering on a minute scale. "It's like a jigsaw puzzle. You have to figure out what size thread to use, and how many bobbins to use.

Mrs. Hedwall has learned to use her electric mixer to speed the winding of her bobbins, then put them to use in Torchon, plum-pudding and emperor's-crown-lace patterns. "Bone" lace was christened when fishbones were used as anchor pins, before the advent of the steel pin, Mrs. Hedwall notes.

Elaine notes that after the invention of pins, women had to scrimp for the costly sewing accoutrements. The savings were called, logically enough, "pin money."

Contemporary lacers are using twines and modern fibers in their constructions, an innovation Elaine contends is the only way to keep this alive. Elaine is finishing an asymmetrical collar incorporating shells and beads. While
The hours invested in the piece would justify the price of several hundred dollars, Elaine says, people aren't willing to pay such prices for such small, painstakingly constructed items.

The Swedes, and Czechoslovaks, she believes, are at the forefront of lace-making.

Elaine Holmquist, (L.) and Helene Hedwall both belong to International Old Lacers, a group formed to perpetuate the art of lace-making. Photo by Greg Gilbert

Haste Makes For No Lace

Lace.

In no other art is a single fiber manipulated so intricately, extensively, with few tools save the hands and brain, in such a slow, slow progress toward great beauty.

Its name derived from "laqueus," the Latin word for "noose" or "snare," referring to the twists and crosses of the thread. In the French Revolution, lacemakers were hanged for outfitting the ousted elite in frilly, ostentatious costumes.

Modern lacers deny that their predecessors actually went blind in the course of their eye-straining work ("If they did, they probably had bad eyes to begin with"), and no note they were more likely to succumb to tuberculosis. The lace factories of old were chilly bastions, where workers with only a pot of warm coals under their skirts for warmth labored weeks in the production of a few inches of lace.

Lace reached its zenith in the 1600s, when it became the rage in ecclesiastical vestments, alter accessories and the clothes of the well-to-do.

Many paintings of the Renaissance portray the popularity of lace in collars and cuffs. Jan Vermeer's "The Lacemaker" painted in 1665, supplied the name for a French film starring Isabelle Huppert.

The Industrial Revolution brought lace-making machines which drastically slashed the time and effort to make lace, transforming Chantilly into an even, perfect pattern, affordable even to those who had once made it by hand.

"Lace production was financially possible only because it used women, poor women, who had no means of defending themselves against the shopkeepers who bought their work for almost nothing and sold it often at 100 percent profit," Collette Van Steyvoort has said. Mrs. Van Steyvoort is President of the Belgian Specialized Lace Commission.

Despite its expense, couturiers are ravenous for scraps of handmade lace to incorporate into their designs. In other countries, lace frequently is framed, commissioned for public art and in Scandinavia, used on a large scale as sculpture, dangling from the ceilings of the modern buildings.

In Brussels, the modern lacemaking nucleus of the world (the stuff is thought to have been born in Italy), The Royal Museum of Art and History has a tremendous lace exhibit, and Mrs. Van Steyvoort is attempting to reopen the school of lacemaking there.

Corsets and stays have helped to define the
human figure. A selection drawn from the
permanent collection includes the un-
yielding "stays" of the 18th century thru
the rigidly boned example of the 1950s.
The pieces on view, mostly from the 19th
century are confined to those worn by the
female gender.

MARCH 1982

73
A HAPPY AND PROSPEROUS NEW YEAR
TO ALL READERS OF ‘IOLB’

1982 will be our eighth year of involvement with Lace and Lacemakers. Each year we have expanded the range of our stock and we now supply a truly comprehensive range of lacemaking requisites, as shown in our Catalogue, Book List and Price List which are available by post.

We are pleased to supply the majority of items by return of post throughout the United Kingdom, and abroad, or in person at Lace Days and to callers.

Our many regular customers will be aware that, for some time now, we ‘have only taken orders for our own turned work on the understanding that there will be a considerable delay before delivery. We are sorry that we must now say “no more orders for wooden bobbins etc.” until we have cleared the present backlog. We will however continue to have some bobbins available at Lace Days. If you have already ordered, please be patient, your turn will come.

In the meantime, the complete range of books, threads and other items is available either from Burton Latimer, or from William and Sylvia’s home in Canterbury. As always, please telephone before making a long journey to check that the items you want are in stock, and that there will be someone there to see you.

We look forward to seeing all our old friends and to making new acquaintances in 1982.

A Very Happy New Year of Lacemaking to you all
Denis, Mercy, William & Sylvia
HAIRPIN LACE DOILY

(See Page 78 for Story)
Presidents Message

Spring is here—and not a moment too soon! Let's take quick look at some of the activities and accomplishments of some of the I.O.L., Inc. chartered groups. Atlanta Chapter of IOL, Inc. in Georgia selected aprons for men and women made of blue weaver's cloth and trimmed each with samples of bobbin lace tatting, and crochet to wear when demonstrating either individually or as a group. They demonstrated at some 16 fairs, shows, and festivals this past year. Betty Kemp, president of this great group was presented the Governor's Award for the Arts by Gov. Busbee of Georgia for her work as preserver and promoter of lacemaking. This is an outstanding recognition for Betty for her tireless and unselfish work with Georgia Council for the Arts and Humanities, with her group, and with anyone who wants to learn lacemaking. It constitutes recognition of lacemaking as an art form at the highest level in all the state. It is a tribute to her, and to every lacemaker, and we cherish it!

Badger Lacers of Waukesha, Wis. has a newsletter with book reviews, patterns for bobbin, and tatting, and a class in bobbin lace. Let me share a charming and well-put sentence from Badger secretary, "We find lacers are really not a small isolated group, but rather many talented people looking for each other."

Columbine IOL, Inc. Study Group presented Denver Public Library with a year of Bulletins and a Lace Identification booklet and planned a week long display of lace.

Bobbins and Shuttles, Ravenswood, W.Va. has applied for a grant for expenses to classify, catalogue, and make a slide program with accompanying text of the Mary Shaw textile collection in the Carnegie-Melon Museum. They also plan a publication for this spring. One of their members, Michael Guisana has been invited to be artist in residence at Art Park, one of 3 New York State Parks for the performing and visual arts between June 29 and July 18. The group also plans to have a teacher to come in for the month of August.

Western Reserve Lace Society, Brecksville, Ohio held a lace exhibit at Middleburg Heights Library in December, and exhibits at Fairview Park Library and the Brecksville Library. Demonstrations were also done for Quaker Lace and at Hale Farm Village.

We have many other fine groups who are demonstrating, putting on exhibitions, teaching, having Lace Days, and winning recognition and happiness for themselves. We want to validate and encourage each and every one. Let us hear what you are doing!

It is a truism, of course, that time and circumstances change, and we all must change with them. A case in point involves our good friends and valued members in England. Some years ago when currency exchanges were much more difficult to arrange than today, your officers established a very good system for handling overseas memberships. More recently, with changing conditions that system seems to have broken down so that both membership applications and payments have been lost or mislaid. A number of persons who had forwarded the dues under our old system did not re-

ceive their cards and bulletins, to their understandable distress, or received them only after unconsciousable delay. Some of those persons have contacted me or other officers directly and we are doing our best to correct this situation. I fear, however, that there are other persons who have become exasperated, or have withdrawn from us, but whom we do not want to lose. If you are such a person, or if you know such a person, please reestablish contact by writing to the Editor directly. We will honor your statement that your dues were paid, regardless of the state of the records, and we will send such cards and back issues of the Bulletin as may be appropriate. In the future, we will handle English memberships directly and individually, which will at least minimize future problems.

Annual Convention—Vancouver, British Columbia, August 1-6, 1982. See you there!

Good Lacing to All,

Valed Buzz Buzzare

1st Canadian I.O.L. Inc. Convention
August — 1-2-3-4-5-6, 1982 on the Campus of the U.B.C. Vancouver, B.C.

These are necessary changes regarding the 1982 Convention, please make notations on the blue brochure in the I.O.L. March Bulletin.

A-2 Edith Starink, is cancelled with regret.
ADDED: is Mrs. Diane Carrier who will teach Class A 1/2 hours, on Cluny. This course will be geared to new lacemakers—an easier technique for working the leaves or petals which will be demonstrated.

Mrs. Carrier is the Eastern Canadian Director. She has received her training in lace in Europe. She teaches classes in Montreal, Quebec, Canada.

B-4 Title has been changed from Armenian to "KNOTTED LACE". This course will be taught by Miss Betty Carlile assisted by Mrs. Tina Vreugde.

Miss Carlile is a retired teacher who has spent many years teaching lace. She has traveled to many of the Lace Centers in Europe and brings to her classes a wealth of information.

PRICE CLARIFICATION: B-Classes are $32. Canadian, approximately $27. American.

REFUNDS WILL BE GIVEN AT THE CONVENTION.

NOTICE

It has been confirmed that one of the I.O.L., Inc. drafts written by a English bank and sent to the United States mysteriously disappeared and never has arrived at its destination. The approximate number of members involved are known, however, we do not have the names and addresses of the persons who are missing their membership cards and Bulletins; therefore, the I.O.L. Editor will upon written request honor the letters of English persons missing the Bulletin for the year 1981-1982. We are asking that these persons submit to us a copy of their check or other material for verification which will enable us to work with the bank for a refund. Even though I.O.L., Inc. is a Non-profit organization it must make payment for everything that is purchased. We are terribly sorry for the inconvenience and delay, so Bulletins will be Air-Mailed to these recipients.

To date all letters received by any of the I.O.L. officers regarding missing Bulletins have been answered.

TO ALL I.O.L. MEMBERS, please send your renewals with a copy of the membership form addressed legibly and with the proper amount of funds, (all foreign members funds to be in U. S. Dollars) please, and send to the our I.O.L. Treasurer. Do not forget to add a return address for your protection if the letter is lost. It is very important for us to have the correct address and zip codes.

The Editor needs correct information regarding the following members and if anyone knows the whereabouts of the following persons DO please contact her.

The Laces of Eva

A Belgian Lacemaker Doll

Irish Crocheted Collar

I have added many things to my lace collection, the Hairpin Lace doily (which is pictured on the cover), a Lace Doll from Brussels—a Irish crocheted collar, and a Bobbin lace end table cover which I made last summer, and received a blue ribbon in our Pinellas County Fair last week.

I have made a flat round pillow with 4-4" squares in the center that can slide up as one's work progresses, and are especially usable when making corners on lace. Just pick up one square, turn it around without having to disturb the pins or pattern under the lace. It is fashioned after the Belgium pillow pictured in a book I bought last summer. I can't remember the name of the book, (it is in Orleans, Mass. and I am in St. Petersburg, Fla.). I padded the pillow first with styrafoam, then quilted material and covered it with a fine weave of black cloth. I make a lot of l'd k' f's and it works out just great.

I have two pupils here. We meet twice a month with four girls in Clearwater to work on lace, and I help them when I can. In the mean time I'm trying to learn to make Honiton!

Eva L. E. Quinn,
Florida

Prize winning end table cover in Bobbin Lace, by Eva Quinn.
Why Wives Break Off From The Chores

SEVEN village housewives take the treat of two hours away from domestic chores each Tuesday afternoon--as members of the Weasenham Lace Group.

Formed last November, the group emerged through an attempt by Mrs. Pauline Ford to learn lacemaking from Miss Kay Brown. "The group grew by accident from just one person wanting to learn," explained Mrs. Ford, whose other activities in spinning and weaving, and her husband Bernard's work making looms and frames for weaving, add to the industry of the picturesque village. "Weasenham appears such a quiet little village," said Mrs. Ford, "yet it's not. There are lots of things going on underneath."

PINHOLES

Members of the group agree that lacemaking is totally absorbing. And for those who lead busy lives it is relaxing but at the same time utterly compulsive, they say. Miss Brown, who travels from Wells to teach the class, explained that the type of lace being worked used geometric patterns.

The lace pattern is worked out on the graph paper for accuracy, then pinholes are pricked out on card to form the instructions which each worker follows. As the lacemakers sat around Mrs. Ford's kitchen table, some of the different patterns and shapes could be compared.

The lace is worked on a pillow filled with packed straw and firm enough to prevent the pins from wobbling. Each line drawn on the paper pattern has to be covered with thread. "It can take up to an hour to do ½-in. if the pattern is hard," said Miss Brown.

Each Weasenham member has a bobbin on her pillow made specially by Mr. Ford to celebrate the formation of the group and he has made many others for marking events such as the Royal Wedding and Mrs. Thatcher becoming the first woman Prime Minister.

Working next to her mother was eight-year-old Lorna Skinner, who has been lacemaking since November.

She had broken with tradition and was making a mat in red and white thread.

On the previous Saturday she had been at Swaffham with her mother, Ann, making lace during a sponsored effort for charity. Mrs. Skinner's effort was in aid of the Foundation for Research into Cott Death. She started making lace at 9 a.m. and when the Mayor of Swaffham, Mr. Jack Sampson, measured the piece at 3 p.m. she had worked 12 in., raising about £150 for the charity.

The Weasenham Lace Group, which also includes Mrs. Joan Ward, Mrs. Lis Paris, Mrs. Doreen Spence, Mrs. Doreen Spicer and Mrs. Nan Briggs, proves that lacemaking is not a craft of the past. "Some years ago it was in danger of dying out, but then it suddenly exploded," said Miss Brown, "and now there are quite a few groups in Norfolk, where people have been brought together by a common link."

By Tom Quill, Weasenham, England.

BRITISH COLUMBIA - 1982

British Columbia
Seems a far away place
I'm going to go there
With my lace.

The traveling time
Will be a pleasure
It's nice to go
To a new adventure.

I know they have plans
To teach and delight us
Some tours and events
And lace to discuss.

I'll greet my friends
Some old and some new
From all over the world
With a "How'd' ye do?"

And "Good Lacing to You!"

Evelyn Misner © 1982
Betty Kemp of Powder Springs, Lacemaking Art No Mystery to Resident

To the novice, it is difficult to conceive how the colorful needle-like strips of wood tipped with bright beads and knobs would weave the intricate, yet delicate, patterns of lace that may wipe away bittersweet tears or accompany a young bride down the aisle on her wedding day.

Lace has been an item of intrigue, romance and always beauty. It's durability and desirability is shown in its survival of the centuries as an art form, thriving and flourishing through people such as Betty Kemp, an English native who has resided with her family in Powder Springs for more than a decade.

This week, Mrs. Kemp was among seven individuals to receive an award from the Georgia Council of the Arts and Humanities for her contributions to lace making as both a crafter and a teacher. The plaque was presented by the Georgia Council of the Arts and Humanities at the Atlanta Memorial Arts Center Tuesday evening.

Mrs. Kemp was nominated for the award by a fellow church member at the Episcopal Church of the Advent in Austell. The lacemaker has been teaching her craft to others there for quite sometime in addition to her voluntary instructing at the Marietta Girls Club on Manget Street, classes for Cobb County Community Schools and the Fulton Country Parks and Recreation Department, private lessons and craft show participations.

The woman who only began making lace little more than a decade ago through a class in England, is a charter participant of the Powers Crossroads arts and craft show which began some 12 years ago and is considered one of the largest and best shows in Georgia by many crafters.

"Stay and See Georgia Week," held at Lenox Square each third week in July, is another regular commitment she makes, as is being a board member on the International Lacemakers Society, now in its 29th year. Mrs. Kemp proudly states that there are more than 2,000 lacers in America, with members representing every state in the United States. The Georgia chapter recently celebrated its first year of existence, she adds.

Some of those international members are former students of Mrs. Kemps', now scattered throughout the country in such places as Blue Ridge, Gettysburg and Philadelphia. They keep in touch though, she adds, the kindred thread of lacemaking strongly bound.

For others wishing to enter the craft she says the basic needs are simple with the help of a little conservative planning. For example, bobbins can average from $30 each to little more than $3 depending on content and whether you make them yourself. Patterns are inexpensive and can be purchased or made, and the two basic stitches of lacemaking can be taught in a couple of lessons; competence and talent growing out of diligent practice, Mrs. Kemp says.

She speaks knowledgeably of her craft and its history, dating back to the 14th century with needlemade lace in Italy, and in the 15th century with the bobbin-made lace of Belgium.

Mrs. Kemp primarily sticks to handkerchief borders and adds having teenagers helped her decide to stay clear of large more time consuming undertakings.

Her children are grown now --- Melanie Jones lives in England; Susan Dodd, Austell; Luci Kemp in Atlanta studying art education at Georgia State University; son, Michael, in New Jersey and John the youngest, with his parents in Powder Springs planning to attend Kennesaw
College.
Right now, teaching and other interests, such as crochet and knitting, compete with Mrs. Kemp's time for lacemaking, which can take considerable time and which she usually does now while demonstrating.

A five-inch square handkerchief trim can take about 35 hours and about 80 is represented in a 10 inch square, she estimates.

"Maybe I'll get more ambitious and do larger pieces in my old age," she laughed, watching the four young ladies seated around a table nearby gingerly making lace of a pink cotton geometric design. "I'll also be teaching my grandchildren, soon," she smiled, of Rebecca and Melanie Dodd.

While her own interest and new revival of lacemaking continues to flourish, Mrs. Kemp says very little handmade lace is sold. "Lace takes so long to make," she says, "that most people prefer to give it away." "You just can't put a price on something they will treasure."

For Betty Kemp, the treasure, in exchange for her time, patience and skill, lies in the making and the giving.

---

**New York’s Own Lacemaker**

Ten years ago at a flea market, Michael Auclair found a group of oddly shaped sticks which he recognized as lacemaking bobbins. Those bobbins started him on the way to becoming an accomplished lacemaker and one of the nation's foremost authorities on antique handmade lace, for with them he taught himself the craft of bobbin lacemaking.

With the understanding of the structure of handmade lace and knowledge gleaned from a library of books gathered from dusty piles in rare book shops, he was soon able to discern handmade from machine made lace, and began to assemble a collection which is featured in the Time-Life ENCYCLOPEDIA OF COLLECTIBLES.

Over the past number of years, Michael Auclair has taught lacemaking workshops at the American Institute of Textile Arts in Boston and the Brookfield Craft Center near Danbury, Connecticut.

An expert in his field, Michael Auclair has been called upon by such institutions as the Metropolitan Museum of Art, the Boston Museum of Fine Arts, Old Sturbridge Village and the Litchfield Historical Society for consultations and appraisals. He has also been invited to lecture and lead study seminars throughout the East coast.

His accomplishments as a lacemaker include several private commissions, reproduction samples of a 17th century black lace hood in the collections of the Metropolitan Museum of Art, and chiefly the reproduction of a group of lace samples made in Ipswich, Massachusetts in 1791. The originals were sent to Alexander Hamilton in response to his inquiries conducted in preparation for his report on manufactures just after the Revolutionary War.

---

**IN MEMORIAM**

_Mrs. Myra Young_  
Washington, D. C.

A Charter Member of the Metropolitan New York Chapter of the International Old Lacers, and a well known and active member since its inception.

---

A reproduction of one of the Ipswich laces.

Michael Auclair is available by appointment for consultations, appraisals, lecture-demonstrations, and private instruction in bobbin lacemaking.

Mr. Auclair recently presented an exhibition of Irish Lace at the Keshcarrigan Bookshop in New York City.
The Diary of An English Lacemaker

I live in a small village in the Chiltern Hills in Buckinghamshire, England, which is situated about 40 miles west of London. My village is called Lacey Green—a very suitable address for a lacemaker!

The area where I live is all farmland, but was used as an air field, during the 1939-45 war by the American Air Force. Some of our villagers remember dancing to Glenn Miller when his band played on Friday evenings in our old village hall. I suppose there have always been lacemakers in our village ever since the Huguenot's brought the art of lacemaking to the U.K. during the periods from 1563 AP onwards.

The Huguenot's came from Mechlin in France, and settled in Newport Pagnell in Buckinghamshire. Buckingham and Mechlin are one and the same, namely St. Rumbald. Buckinghamshire is noted as the County of beautiful lace and Mechlin as the city of costly lace. Lacemaking was established in Bucks, Beds and Northamptonshire and Devon. Women and children were involved in the making of point lace, from that time onwards, 400 or more years have passed, but in spite of all that has happened there is a great deal of lace being made again in England and Wales. As a relative new-comer to this beautiful art, I thought it would be of interest to look back over a busy year and recall the pleasures and rewards of my year just passed.

My lace classes continued from January to April, each Tuesday afternoon; and from September until November, each week in Hughenden Valley Village Hall. Desraeli, Lord Beaconsfield lived in the Hughenden Manor when he was Prime Minister of England, and the Manor overlooks the valley. The teacher of these lace classes was the well known lacemaker, Mrs. Joan Buckle.

Saturday, February 21st, I attended a Study Day at the Victoria and Albert Museum. The keeper of the Department of Textiles and Dress lectures on the development of bobbin laces, and why they occurred. This was followed with a lecture by the President of the Belgium Lace Commission, Colette van Steyoort. We visited the Museum Lace Study Room and saw the beautiful old lace collection, and we photographed the modern exhibition of lace belonging to Colette van Steyoort. Her fresh approach and use of fibres opened a new avenue of of lacemaking to many of us who saw it. We marvelled at an embroidered jacket having gold lace in room 53 of the Museum. We viewed the 17th Century lace collection and the lace paintings.

After lunch Bridget Cook, lacemaker and author, gave a comprehensive analysis of stitches, and Susan Cox, principal of the English Lace School, Tiverton, Devon gave a talk on the value of new approaches to lace. The day ended with discussion and questions. It was truly an exciting and a happy day mixed with the pleasure of seeing old friends and acquaintances from England, America, Australia, Holland and Belgium.

On Saturday 14th of March, I attended a Lace Workshop in Princes Lisborough, a small market town 3½ miles from my home. It was here that much black silk chantilly lace was one made.

The following Saturday, the women's Institute of my village held a craft and curio exhibition in the new Village Hall. I was invited to put on a lace exhibition and to demonstrate lacemaking. This aroused much interest in lace as many W.I. members brought their precious pieces of old lace, ancient lace pillows and bobbin collections.

Another lace workshop was attended on March 28th, at Lisbourne School. The tutor was Ann Woodward, and there were many classes in different laces, each having their own tutor.

I worked on Honiton lace. My youngest son had given me an old ivory carved fan which is nearly 325 years old. I spent so many hours with fine graph paper reproducing the design of roses and leaves into a lace pattern, and will be my project for the next two years. My tutor looked at my charts and prickers and wished me "good luck", and the fan was started!

On Friday, April 3, it was a visit to an old lacemaker of 93 years, (she started lacemaking at 5 years of age). It is is always a delight and an education to visit Mrs. Adams, who imparts endless bits of information to 'listening ears.' She has lived in Lacey Green all her life and has made a great deal of lovely lace.

A most important date, (April 25) when we went to Alcester in Warwickshire, with Joan Buckle to the A.G.M. of the Lace Society.

The car was loaded with our lace pillows, lunch and thermos flasks as we set out early in the morning on a lovely drive, for April Day. We met many lacemaking friends who entered the competition for a greeting card. We also stocked up on lacemaking supplies before returning home just ahead of a great snowstorm.

May 1st, another demonstration for a May Day Fair, a three day event in High Wycombe, at St. John's Church which is almost 800 years old. The exhibition of embroidery, needlework and bobbin lace was lovely. We met Joyce Wilmot there.

June 13th was an important date, the Lace Day in Farnham, and meeting with the Hampshire and Surrey lacemakers. Pamela Nottingham was the speaker, she displayed her antique lace collection and her Thai land silk and bobbins. She presented a most informative talk on lacemaking and...
Some of the appointments were totally unsuspecting, and Saturday, July the 4th found me sitting in a windy field under a sun umbrella, surrounded by bales of straw to keep the wind off while making fine point lace at a Young Farmers Rally.

The high spot of the year was upon me, as on July 9th, I set off for Kempshort in Hampshire, my son’s home. He took me to Farnham to meet my dear friend Stephanie Warren, and with her car loaded with lacemaking equipment we headed for Somerset. We were making our annual visit to Dillington House, to make Honiton lace under the tutelage of Mrs. Elsie Luxton and Mrs. Joan Clarke, a week of intensive lacemaking. This visit was a most pleasurable one because the wood carvers course was included this time—and many lacemakers are married to wood carvers. It was sheer delight to see the lovely lace with the beautiful wood carvings in an exhibition!

Dillington House is such a beautiful and comfortable place. It is an Adult Education College, (the home of Lord North, when he was Prime Minister to George III), and it was here that the Treaty of Independence for the Colonies was drafted and signed.

September rolled around and there was another demonstration at High Wycombe, the Annual Show and Gymkana having 10,000 visitors in attendance.

A Lace Day at Caversham, in Berkshire was held October 10th, and we were entertained in the afternoon by members singing the “Old English Lace ‘Tells’.”

The Barbara Edwards Lace Exhibition seen at many English events. Note the fan pattern (in the middle) which she designed to make in Honiton Lace to cover a 325 year old gift.

On November 11th I was on a plane bound for Denver, Colorado for a three month visit with my family in Lakewood. There I demonstrated to Brownies and Girl Scouts and again visiting friends and the I.O.O.F. Editor.

Thanks to His hands man is a maker in a way birds and beavers are not, but I believe there is something of Divine about Man, when inspired with imagination he uses his hands to make things that are lovely.

Barbara Edwards, Lacey Green, England.
Dorothy Person, (I.O.L. Stamp Committee), Vancouver, Washington, collects sheet music and this is the only one having lace that she has ever seen. Dorothy also teaches lacemaking in the Vancouver schools.

Lace Work in Quebec (1640 - 1850)

Madame de la Peltrie and the Ursulines are the women who brings the needlework since the establishment of the early colony.

These women at that time, were very bored since the colonization of Quebec. The land was dry and barren, and the winters were very cold and harsh, so they taught their lace needlework and bobbin-lace techniques then later had their finest achievements displayed in the monasteries in the area. The Jesuits loaded the necessary materials needed in the making of their lace and transported it by means of boat from France to New France.

Their fashion was identical to one of the French. After that, the colonist came to settle in the country that virtually supplied them in clothing. Later, the noblemen arrived, their clothes covered with frills and cuffs made of lace. Soon the garments changed from lace to fur and leather due to the severe climate which meant working mainly out-of-doors. Once in a while, on very special occasions, their fanciest laced wearing apparel was worn. The women stayed at home minding their families while sewing their own clothing and trimming them with their own lace. They were the ones who made it possible for this fashion trend to continue.

The younger girls were eager and willing to learn about the techniques and to work on the fabrication of the bobbin-lace, but the nuns of the monastery made it impossible. They were denied any use of the tools. They left knowing that they would never get a second chance to learn.

In 1850, following the great Irish famine, numerous families came to inhabit America. The Irish, having known of crochet-lace for several years, taught the art to the women of the colonies. The crochet-lace was renowned throughout the country with great success. The success achieved by this simple, yet economical, tool, the crochet, which was very easily procured and was made to facilitate the apprenticeship.

Thousands of French Quebecois used the crochet-lace method. Women and young girls crocheted in schools, monasteries and homes to surplице the preachers and the children of the choir.

In many French Quebecois villages, the priests, during the weeks before Christmas and Easter, asked the women to decorate their churches with their lace-work. Besides minding their families, praying and fasting, by their religious convictions, their arts were achieved with their own hands, hours at a time, making the beautiful works of lace. These pieces were then given to the priests of the villages and were proudly displayed in their churches on holy days and on every Sunday.

In 1900, English and American magazines with crochet-lace and tatting were imported to widen their pattern variety.

For 20 years, the nuns had given up teaching crochet-lace to the younger girls, so little by little, the crochet-lace was being forgotten and discontinued. After the transformation of religious ceremonies, many priests sold their most beautiful pieces of lace-work to auctioneers from afar. Most families got rid of theirs as well, never having known of there true value.

For several years now, our olden-day wors of art have created a very special interest. Many French Quebecois are presently interested in lacing techniques. A few have even moved abroad to study bobbin-lace.

Today, the French Canadian lace-makers are perfectioning their art in lace and are conveying their knowledge to the interested, while creating new styles with phenomenal improvements, and in Quebec, there is nothing but a long pursuit.

Letter to Stamp Committee

Mr. Jack Williams, Coordinator  
Citizen's Stam Advisory Committee  
L'Eufant Plaza West, S. W.  
Washington, D. C. #20260

Dear Sir:

In a issue of International Old Lacer's Bulletin, I saw where this organization is trying to convince the U.S.A. Post-office to print some stamps with a pattern of old laces, this special old craft goes back to before Christ; I am much excited about this idea too. The Danish Postoffice have just done a wonderful job of printing such stamps in connection with a big beautiful exhibition of old Laces; I am enclosing an envelope with these special stamps for you to look at. I was born in Copenhagen, Denmark and came to this wonderful country, USA., in 1948 and over the years it has always been my big ambition to go back there some day and learn how to do this fine old art and craft "Tønder Lace", so I finally had the chance last year. And I spent 3½ months with one of the experts there Mrs. Sina Kielberg, Holbaek; I left left her with my teacher's certificate and was at that point looking forward to the next step, going back to the U.S.A. and turn my knowledge over to the American women. I have already started the classes in Bobbin Lace and the interest for this art is getting bigger every day.

The Seattle Art Museum has had an Exhibition "Patterns of Fibre" with demonstrations and a workshop. I did have the chance to show and talk to people about Tønder Bobbin Lace, it was well-received by the public, and several women have now signed up for lessons in my home.

Back in 1935 the Chicago World's Fair, became a big event for a little Danish lady, Mrs. Lorensen, Tønder, Denmark. She was the only person there to receive the Grand Prix Award for her laces, and today her daughter Mrs. Anna Kjems, 87 is continuing the tradition and promotion of lacemaking in the school of Ballum which is right on the borderline between Denmark and Germany.

Sincerely yours,
Ruth Hoegh-Christensen  
Mercer Island, Wa. 95040

NOTE: Keep your letters flowing to the Advisory Committee, we understand that they are beginning to ask for Lace designs.

Falls Church, VA.
A collection of Armenian Laces made by Alice Kasparian and her mother.

Alice Odian Kasparian, a University graduate, professional Chief-Pharmacist, is a writer and author of three published books. She is a lecturer, world-traveler and award winning camera fan, as well as an expert lacemaker, an ancient art which she learned from her mother when she was only six years old. Her lovely creations have been exhibited in Washington, D. C., where among 3600 exhibited handicrafts, her laces were awarded the FIRST PRIZE and overall the highest GOLD PRIZE. Her works have also been exhibited at the Boston Fine Arts Museum, Worcester Memorial Hall, Boston Science Museum, International Institute's "All The World" exhibition in Hyenes Auditorium, in Jordan Marsh Exhibition Hall, at the Armenian Bicentennial Show in the Boston City Hall, and many other places. In 1973 she was invited to exhibit her Armenian laces on T.V. Channel 5's "Good Morning" show. In 1976 she appeared on the "Women 76" program, on Boston's T V Channel 4.

She has been invited to lecture and to exhibit at the A.S.A. Armenian Vision program in the Belmont Memorial Library. She also participated in a International Exhibition held at the beautiful Waltham Public Library.

Pictured are Armenian Lace pieces made by Alice Kasparian, however, the lace insertion on the bottom is the work of her mother which was done about eighty-five years ago.
The Flair of Victorian Tatting

Tatting, a knotted or half hitch process belongs to all knotted laces such as filet, macrame and Armenian lace. It's origin is obscure as to date and country. We assume, as all netted laces derive from fishermen in coastal and lake regions, that we can surely say that the tatting shuttle is a fancier form of the netting shuttle.

It's height of popularity dates to the Victorian era when it was very common for both men and women to tat. It has been written about as far back as 1680 in Italy. It seems to be most popular in western Europe where it spread from Italy to France and England. It is the English who make much use of it in fashion and trend. We see many 18-19th century paintings with ladies of the courts tatting, although it often seems to be used for the painting, both painter and client oblivious to the art of tatting.

It was considered high fashion for the young ladies to flirt with men by intriguing them with their tatting and even going so far as to teach them to tat. Women were bold enough to do their tatting in court and church which later became forbidden. It was not until the late 17th century that instruction could be found in schools. Every proper young lady had a tatting bag to hold her work. Shuttles range through wood, ivory, silver, gold, mother of pearl inlays, you name it. These ranged in size from 1" by 1/2" to 8" by 2". The interest went up and down, trends being revived every 50 years or modified. Tatting took on a strong hold in the U.S. from 1850-1930, therefore many of our grandmothers know how to tat. Since tatting is highly portable it was specially favored for long journeys and waiting periods. After 1920 much of all these trends slowed or stopped.

Clara Morris in "Life on Stage 1961", stated she earned herself some extras by tatting during rehearsal breaks and on tours. She does not mention the fact that it also is a nerve soother and relaxer. In 1853 the first mention made of the Picot and from then on tatting was done in one continuous process, prior to this all tatted rings had to be sewn together. One may be bold enough to state that tatting is nothing but a glorified double half hitch and Josephine knot, but we must admit women have done wonders with it and created some very exciting works. Mostly doilies, trims and collars though it could be made into complete garments.

In 1910 Ladies Home wrote about the use of two shuttles. Nichols in her book on Tatting speculates that it was developed by sailors and spread quickly at all coastal regions. The name tatting means various things, each country having a slightly different meaning.

Italian - Occhi meaning eye or eyelet, is also a sown word.
German - Ochzi or Schiffschenarbeit - meaning little boat work
France - Frivolite
Sweden - (Pee-val-ee-tay)
Finland - Sukkula-pitsi shuttle lace
Skkula (shuttle) pitsi (lace)
England - pearling
Estonian - Sustickpitsi, or Kudumine
Iceland - Taeta - to comb or tease, a wool or sewing, little knots to cloth

The word tatting is supposed to have derived from the Icelandic word Taeta. Webster's dictionary defines tatters as a medieval beggar's dress or raggy clothes. The people wearing these were called Tatter demalion or ragga muffin. Whatever the history it is fanciful and varied and fun to research. Our best in tatting comes from Victorian history.

So now lets try some tatting and see what we can do. Any materials can be used. You can tat without a shuttle or as many as three, two colors can be used or different weights of materials. Avoid knobby or fuzzy yarns. You may need a crochet hook. Shuttles vary in size, the smaller the shuttle the smaller the thread, the bigger the shuttle the more it holds and can be used for both heavy and fine thread.

Tatting is both relaxing and portable, perfect for traveling, sitting on a bus or at a lunch break, the golden rule is once you know how, teach a friend.

Staten Island, New York 10306
This little vest of heavy cotton cord will fit a child up to about eighteen months of age. The method of working should be easily adaptable to another size, as long as darts are not required. A beginner can easily make this vest. A basic "how to Macrame" book will give a description of the knots.

The garment is worked all in one piece. Select a simple pattern of the required size, on which the center front line is marked. Make one full back piece and 2 front pieces out of heavy paper, (brown grocery bags are great for projects). The front and back pieces are joined along the shoulder seam lines. No seam allowance is necessary. The work proceeds downwards from the shoulders in both directions. The vertical threads are continuous across the shoulders, hanging down front and back. Place enough verticals here to loosely fill the shoulder seam area (10 threads were placed in the example). Now, lay a horizontal across these threads and along the seam line. Each vertical works a hitch along this horizontal thread. The horizontal thread becomes a vertical until the next horizontal point is reached. Any desired filling may be worked between the horizontal rows as long as the number of required threads comes out even. A horizontal has been placed at each point where it becomes necessary to add more vertical threads for increased width. The horizontal is stretched along the outline and new threads are hung on it with lark's head knots. For the actual path of supporting threads, please see the diagram. New threads are added with lark's heads at x, y, and z. The tricky part is deciding how many threads to add. Remember that it takes 4 threads for each square knot, so the total number of threads must be divisible by 4. Work each yoke down to the beginning of the underarm seam line. Then all the parts are joined and the bottom of the vest is worked as one unit. After a double row of hitches the remaining threads are cut off and fringed. For the ties, double cords are joined where desired with lark's head knots.

I whipped out this little vest four or five years ago when my little boy was small enough to wear it. In macrame, a picture is worth more than a thousand words.

REMINDER
All Memberships are due by September 1, 1982 in order to be on the I.O.L. Mailing list. Renew Now.
Presidents Message

Today I am just 'bustin' with pride and joy—all because of you, Lacers! Last year when IOL applied to Internal Revenue Service for tax-exempt status, much information was requested. At that time letters were sent to various groups asking for volunteer hours spent by members in demonstrations, lectures, slide shows, library work, exhibits, and any other type of activities to spread and promote information and knowledge about lace and lace related interests to the public. The answers brought a temporary tax-exempt number and the low cost mailing permit. This year IRS will give the final determination of our qualification as a non-profit (and tax-exempt) organization. A week ago, some three dozen cards were mailed to various groups and the I.O.L. Inc. directors asking for the hours that were spent this year in the same sort of activities. The first FIVE that have returned had over 630 hours spent in furthering lace education! Isn't that wonderful, and doesn't it make you proud to be a part of such a wonderful group of people? If the other 30 are anything like these 5, imagine what the total is going to be! If any of you have never heard of this campaign for reporting of hours spent furthering lace education and have not reported any before, you may now report—please let me hear from you at once. Even if it is only single hours we want to know about it, and to hear from you, and know what you are doing!

Not only have there been numerous postal increases, but the cost of paper, printing, and all related items have almost doubled. Without the exemption certificate, we would have not been able to publish the Bulletin on a bi-monthly basis this year. Several have asked about the directory, and the charge for that. The rising costs are again the culprit. We all wince at the thought of ever-rising costs of just about everything, and I.O.L. Inc. has not been spared. Every increase in the cost of paper, envelopes, services and printing is passed on to us.

The March Bulletin 1982, has a list of the library books. Several have since been added. If you require some special bit of information, ask the librarian. Do use and enjoy your Library.

Many of us are working on what we hopefully plan to be entries in the lace competitions at the English Lace School, Tiverton, England, and the Grands Concours Internationaux de Dentelle in Le Puy, France. Good luck to everyone and let us know what you made.

The annual convention is August 1-6, 1982 in Vancouver, B.C. Canada. There will be wonderful workshops, socials, teas, 2 tours, a banquet, AND the annual business meeting—not to mention the surprises and the raffle! Plan to attend and to meet everyone and get to know this wonderful group as individuals.

Have a good summer!

Vada Belle Glashow

1st Canadian I.O.L. Inc. Convention
August — 1-2-3-4-5-6, 1982 on the Campus of the U.B.C. Vancouver, B.C.

Adjournment

ANNOUNCEMENT

The Chicago Area Lace Guild will hold its first program "An Introduction to Lace" on September 11, 1982 at the Culture Center, 78 East Washington Street, at 1:30 P.M. We first met on May 1st to determine if there was sufficient interest to form a group. The Planning Committee, composed of Wilma Hooser, Dorothy Magos, Audrey Webbin, and Arlene Wilson is working toward Chartering as an IOLI group.

Interested LACE people are invited to attend.

Using I.O.L. Library — Pays

Recently my husband and I purchased a blown glass lace lamp identical to that pictured on page 87 (left) of Huetson's "Lace and Bobbins." Had I not already studied the book, I might have had my doubts regarding the dealer's claims. However, it supposedly came from a house in Maine where there lived a lacemaker, and I like to think a seaman brought it home for his wife or mother from one of his trips to Europe. I had never seen one before and may never see another.

Priscilla Gray, MA.

AUSTRALIAN MEMBERS:

16 May, 1982

Once again it is time to renew your subscriptions to I.O.L., Inc. Those who would like me to forward their payment to America, would you please send me either a bank or a personal cheque made out to G. M. Perkins, to the value of $10.50 (Aust.) plus 12 cents for interstate cheques together with your COMPLETED membership form, before 28th July, 1982, and I will send the subs in bulk again. Last year we had a problem with increased fees and as there was not time to collect the additional money from you before the enrolment deadline, I made up the difference myself so you could each then receive your magazine by air-mail. That turned out to be "not a very good idea" as I have not been reimbursed fully by everyone and so I am NOT prepared to do this again. To those who have already sent their subs, would you please send the additional money to make up the $19.50 or your magazine will be ordered to come by 1st class mail which will take 3 months or longer to arrive. Please note that each of you are expected to pay a share of the bank charges and postage in addition to the subs.

Mrs. G. M. Perkins,
80 Cochran Street,
MITCHAM, Vic. 3132
AUSTRALIA

Assistance Requested

Anyone knowing the whereabouts or address of a Mrs. Gladys Hassel who once lived at Saba in the Netherlands Ontillos, please contact the I.O.L. Inc. Editor. There is an important message waiting for her. Thank you.

Write any information you have to:
Mrs. Robert C. Ridell
P. O. Box 1029
Westminster, Colorado 80030 USA

Thank You

The Editor wishes to thank all members who sent information supplying material needed to locate several persons. Your responses have been most helpful. Thanks to all of you.

Mrs. Robert C. Ridell
New Charter --
Alamo Bobbin Lacers

In January a group of bobbin lacers in San Antonio, Texas started taking lessons from Patsy Anderson to increase our abilities as lacers. Then decided to form a lace group in San Antonio which would be affiliated with International Old Lacers, Inc., and so the Alamo Bobbin Lacers was formed. Our charter was officially accepted in March, 1982. At the first meeting the following officers were elected: President-Patsy Anderson; Secretary-Treasurer, Amy Groff; Telephone Chairman, Sue Daeschner.

The beloved matriarch of the group is Helene Hunt who is a source of inspiration and a wealth of information. At our March meeting we had "show and tell" and everyone brought antique lace pieces and Mrs. Hunt helped us identify them. Her own lace work is very fine and traditional, and she is both amused by and interested in all of us want to learn so many different kinds of lace and the contemporary methods. She encourages us to be perfectionists and to keep the quality of our work as high as possible.

Soon after forming our group we quickly arranged for two workshops to increase our knowledge of bobbin lace. The first one, in April, was a workshop on Bucks Point with Margo Winstead from Houston. The second, in May, to be "Design and Use of Color in Torchon", with Peg Harding from New Jersey. Living in a bi-cultural, Mexican-American community we have learned to love bright and bold colors, so we look forward to this workshop.

We also have been offered two excellent opportunities to demonstrate lacemaking. Each year during the third week of April, San Antonians celebrate Fiesta San Jacinto or "Fiesta". This joyous and colorful spring festival is a celebration of the Battle of San Jacinto, (1836) when Texas won their independence from Mexico. As part of our contribution to this holiday we took part, with other artists and craftsmen, in a Village Fair at The Yard, a rustic shopping center consisting of antique shops. We discovered during the picture taking in front of the Alamo that whenever we get our lace pillows out to make lace, we never fail to draw a crowd!

Later in the summer the Institute of Texan Cultures at San Antonio will hold its Texas Folklife Festival which demonstrates the varieties of cultures that came together in Texas. The organizers of this event had read the newspaper article which was reprinted in the I.O.L. Bulletin, (January 1982) about Helene Hunt and Patsy Anderson, and Patsy was called and asked if she and Mrs. Hunt would demonstrate lacemaking at the Festival. Patsy responded with "a group had been formed, all of them would like to go." The Festival will last four days with several hundred thousand people attending. This will be a great opportunity for us to demonstrate our craft.

We are very excited about the coming year and our future affiliation with International Old Lacers, Inc. We have several more workshops tentatively scheduled and a couple of very interesting suggestions for service to our community.

Amy Groff,
Secretary-Treasurer
Little Red Riding Hood in Lace

The cover picture, "Little Red Riding Hood" is a pillow top made of Needle Lace, one of many lace nursery rhymes in the Mrs. Jackie Friesen collection. This one had belonged to her grandmother.

Mrs. Friesen also collects birds animals and butterflies in all types of hand made and machine laces.

Jackie is a Charter member of the Columbine I.O.L. Lace Club of Denver formed in 1968. Recently the group was presented their IOL, Inc. Charter in a special presentation held at the home of Mrs. Laurenza Senter who privileged the group to view her rare lace collection gathered from around the world.

The Venetian lace scarf is 7 1/2 feet long, and is worked in Cantu using the finest threads.

The tablecloth of the Last Supper was made in an Italian Convent. This banquet size cloth is worked in Needle Lace and took many Nuns more than 30 years to complete.

A Venetian Scarf.

Columbine group at a Charter presentation.

The Last Supper in Needle Lace.
Salem Women Make Success Out of Old Lace

SALEM--They have dubbed themselves "the doily sisters," but the quip doesn't really cover the efforts of Patricia LaGai and Elizabeth Southwell, co-owners of the Salem shop...And Old Lace.

The two women recognized the allure of fine lace before it was revived in the fashion world and have built a prosperous business on the restoration of antique dry goods.

"The local businessmen laughed at us," said Mrs. LaGai. Today though, there are no more patronizing smiles. The shop ships orders nationwide, and out-of-state lace collectors take side trips to...And Old Lace.

It was opened in 1976, short-16 before the revival of interest in fine women's handcrafts. "Our timing was just right", said Mrs. LaGai.

"Lacemaking was something that was considered just a hobby. It was women's work that wasn't taken seriously in the past," she said, adding that it has only recently been recognized as an art.

The shop is crammed with fragments of old doilies and laces. Linen and lace tablecloths are neatly pressed and tied with colored bows. There are also collections of old buttons, quilts as well as antique clothing such as wedding and baptismal and communion dresses, all sidelines with women.

"One thing we weren't prepared for was the variety of people that come into our shop," Mrs. LaGai said. "It's fascinating--young and old, men and women."

Each woman works three days in the shop and spends the other three days laundering and mending the antique lace and linens they purchase.

Most of their stock comes from word-of-mouth customers who fetch yellowed linen goods from their attics and cupboards. They also receive some stock from Mrs. Southwell's mother, Pauline Stark of Portland, who sells antique linens at her home and at flea markets.

"I think we are the primo laundresses of the world," Mrs. Southwell laughed.

They use boiled starch and a gentle enzyme for whitening old linens. When all else fails, the goods are taken to the "lawn of last resort."

Mrs. Southwell lays a tablecloth out in her back yard where she said the chlorophyll from the grass and the sun's rays work bleaching miracles.

"The sun is wonderful for tomato-based stains," she said.

Often, Mrs. Southwell said, she will spread goods overnight on the kitchen floor to allow them to thoroughly dry after steam pressing. This is a bit taxing on her teen-age daughters, who complain of the "great white fallout."

Her daughters also dislike competing with the linens for the washing machine and tire of finding frozen starched tablecloths in the freezer or refrigerator. The dampened tablecloths are frozen so they will not mildew before they can be ironed.

When the goods are cleaned and mended they are frequently recycled, an intrinsic part of the business. A table lamp in the store holds a shade made from an embroidered table runner; doilies are fastened to wooden bells as window hangings.

"If something is a tablecloth, it doesn't have to stay a tablecloth. It can be turned into a jacket or skirt," Mrs. LaGai said.
Period clothing is one of Mrs. Southwell's specialties. She cleverly combines her own wardrobe with pieces such as a classic black 1940 suit and a white Victorian blouse.

She uses fragments of old lace and linens to design camisoles, blouses and other accessories under the label "Southwell Eccentric Originals."

The women have compiled idea books on the hundreds of ways lace can be recycled. Tablecloths can become Christmas stockings, sachets, pillows, canopies and bedspreads. Assorted doilies can be combined for a novel place mat arrangement, and edgings from pillowcases can be used for camisoles and blouses.

The shop, the women said, is not just a pastime, but a serious business venture. It also reflects their philosophy on the preservation of women's handcrafts passed down through generations.

"We like to think we are doing our part to recycle things that are beautiful and encourage that fine women's art not be discarded," Mrs. Southwell said.

Reprinted from The Oregonian, By Peggy Sand, Correspondent

Canadian Lace Exhibit

I am giving an exhibition on my lace collection which I have assembled over the years, and have been given a Canada Council Grant to do so.

Last year I took a course with Doris May on Lace Identification in Boston and I would like to learn how to make bobbin lace. It is very hard to find any information on Lace in my area, or to find anyone who teaches this art.

Margaret Ruhland Ottawa, Canada

Lace Pattern Puzzle

Who, can tell us how to carry out the markings on this old blueprint pattern? The only pinholes definitely marked on the original have been inked in. The other pinholes were indicated only by the paths. On one repeat the blocks were inked solid and one figure had a path drawn in.

Lynn Hartzell

Just two months ago I was privileged to hear about your wonderful organization through a marvelous lady, Mrs. Marguerite V. Bieger, of Fillmore, California. Within a few weeks I had acquired Doris Southard's book on bobbin Lace Making and then made my own Belgian pillow and have been making lace ever since.

Marguerite invited my friend from Spain, her mother and me to demonstrate the art of lacemaking at an exhibition in Fillmore. Even as novices--we placed Third in the entire Arts and Crafts Show.Mrs. Bieger's booth won top honors.

Lynn Hartzell

Mary McPeek, Michigan
Cleveland Chapter Weaves Pattern of Activity

Proud of their newly received charter, the Western Reserve Old Lacers are busily educating each other and the Cleveland community in the appreciation of lace and lacemaking. Chapter President Arlene McKinnell will be teaching bobbin lacemaking at Akron University and Glina, and demonstrating it at Halles Highbees in Garfield Heights, and at Hale Homestead. Marjorie Bruegger will speak on bobbin lace to the Brecksville Library Auxiliary.

Western Reserve Old Lacers sponsored a large exhibit at the Middleburgh Heights branch of the Cuyahoga County Public Library. Lace fans, bobbin lace samplers, "Limerick" lace from Ireland, collars, kerchiefs, and a crocheted necklace with pearls appeared with a lacemaker doll, and samples of teneuriffe.

An old-fashioned lacemaking machine and antique booklets with lace camisole, patterns brought back the essence of the past. Three elegant Victorian ladies appeared in portrait along with a crocheted lace table cloth that took two persons two years to make. Another portrait of a "Gibson girl" showed her wearing a dress with a sheer panel of machine-made lace which lay draped in the case next to her photograph.

An exotic delight was offered for the exhibit by Mrs. Anna Jesenko—a lace angel of her own design. Mrs. Jesenko's lacemaking technique proves that the "hand is quicker than the eye" as she works magic with her large Slovenian bobbins. Anna learned lacemaking in Yugoslavia as a child.

The chapter is equally proud to have Luz Fuentes as its member. Miss Fuentes, who is from Puerto Rico, was sent to Spain as a child to learn lacemaking.

The Western Reserve Old Lacers' exhibit was especially noteworthy because of its diversity. In addition to items already mentioned tatting and Brussels were well represented. The chapter will sponsor two exhibits; one in Brecksville Branch of the Cuyahoga County Public Library and a second exhibit at its Fairview Park Regional.

The spiritual aspects of lacemaking have not been overlooked by the Western Reserve chapter. Kathy Wilmer has written a poem entitled "How Lace Grows" and she has made it into a note paper described as a "Lacemaker's prayer of praise."

Kathryn G. Wilmer

Western Reserve Old Lacers.

Groszberg Display

LACE ON DISPLAY: Elizabeth Groszberg who has been making fine lace since her teens is willing to teach anyone to learn the art of lacemaking. Her collection will be on display at the Lake Worth Library. (Photo by Anne Gray). THE LAKEWORTH HERALD

Mrs. Groszberg spent nine days last fall in her native Hungary, traveling with her son, George. They visited Budapest and Vienna, and their home town. She says, "I even got to Halae where they make the famous lace, and bought a few very lovely pieces."
Volcano Lace Makers

On December 10, 1981 the students and friends of Iris Berger lost a master craftsman to heart failure.

Iris was a giving and loyal lady with her knowledge of many needle crafts and her most cherished and historical study was of bobbin lacemaking. She shared all of her many hundreds of patterns and gave instructions for them. She taught many to appreciate the old art and to carry the craft through to the next generations. Our group of lacers was forming a charter membership with I.O.L.I. under the encouragement of Iris.

On page (104 & 105) is a place mat she (Iris) had made the lace and hadn't yet sewn in the loose threads. They were tucked under to have the lace zeroxed for patterns. After her passing they were printed and laminated for each of the members to have a set in memory of Iris. She willed each of her students one of her bobbin lace pillows.

The booklet cover for the membership addresses and meeting dates and places was designed by Reha Seekins a new member and the last student of Iris. The lace shows the lava spread (dark), the three steam plumes and the destruction of down timber at the base of the mountain. Our new Chartered Club will be known as the Volcano Lace Makers.

$\text{---Dotty Person}$

Pays Tribute To IRIS

This poem was written by one of our members and read at a meeting held in memory of Iris Berger

In memory of our beloved Iris Berger who gave of herself unselfishly to pursue and promote lacemaking.

She gave of herself
Her talent to share.
She worked with her hands
With loving care.

She called on the phone
To keep us in touch
With heart filled with love
We thank her so much.

To our club she was faithful;
She left quite a trace
Of her influence on us
And her great love for lace.

So Iris your memory
Will not be forgot.
We'll think of you often
And the classes you taught.

Your presence is missed
And so it shall be
Your name on our charter
Awarded posthumously.

MALTESE LACE (Bobbin Lace Making)

Maltese Lace is a craft that can be traced back to about 1640 in the time of the Knights of St. John, being then used mainly by the churches. Unfortunately we do not know exactly about the origin of Maltese Lace.

However, a book in Maltese, called "Lace Worked in Malta and Gozo", which was printed in 1920, contains some important information. In 1833, Lady Hamilton Chichester brought lace workers from Genoa to revive the industry which she succeeded in doing with marked success. The "wheat grain" or "leaf stitch" or "goski" ornament which features prominently in current designs dates from this time.

In 1846, Father John, a Gozitan Priest, brought some patterns, different from those used during that time. Lace stitches used by Maltese Lace-workers are the whole stitch, half stitch, net stitch, English stitch, ball stitch, rose—and picot stitch, ornamental ground stitch, etc. The pillow on which the lace is worked has the shape of a cylinder.

Irish linen thread was introduced in 1932 replacing the black and cream silk threads that formerly characterized the Maltese lace. New designs and high-quality work led to pre-war exports amounting to FML0,000 a year. Stockings were often unpicked to provide thread during the last war. Whilst, the industry has declined considerably since the war, growing tourism is again encouraging the craft. In government Trade Schools this craft is being taught together with the other crafts.

The Magic Hanky!

I'm just a little hanky as square as square can be,
But with a stitch or two, they made a bonnet out of me.
I'll be worn from the hospital or on the Christening day.
Then I'll be carefully pressed and neatly packed away.

For her wedding day, so we've been told,
Every well dressed bride must have that something old.
So what could be more fitting that to find little me.
A few stitches snipped and a wedding hanky—I'll be.
And if per chance, it is a boy, some day he'll surely wed;
So to his bride, he can present the hanky once worn upon his head.

A HANKY OR A BONNET!

The poem and the folding 'know how' came from Susan Biedermann, (Gertrude's daughter-in-law) who is of Irish descent and this is an old tradition in Ireland.

Martha Anderson

New Zealand Bobbins

I purchased some Bedfordshire bobbins from Mr. Peter McLeavey in Auckland, New Zealand. They are beautiful, made from native New Zealand woods—well made and smoothly finished. His delivery was so prompt, and I feel I.O.L. members should know about him. These beautiful and different woods would be a welcome addition to any bobbin collection.

Mrs. B. Huizing, Ca.
I promised to give you the instructions for the Hairpin Lace Shawl pictured in the July, 1981 Bulletin. This shawl is 70 inches wide and at the center point in the middle, 26 inches long not counting the tassles.

My work is loose rather than tight, so if your work is on the tight side, you'll have to compensate by adding more loops and using a larger crochet hook than called for.

This shawl will compliment a size 12-14 size dress. If you wish a larger size you can add a longer center strip and make all the other strips consecutively (6 loops) shorter following the general directions.

Good lacing to you all.

Evelyn K. Misner

HAIRPIN LACE SHAWL

MATERIALS: 6 BUCILLA MELODY (50% Mohair - 50% Acrylic) 1 ounce balls - (green)  
GOLD METALLIC to be used - 1 strand with 1 strand of green (to be used as 1 strand)  
3 inch HAIRPIN LACE LOOM  
F Crochet Hook  
BEADS (about 100) 8mm Faceted gold beads

(Number of loops on diagram includes total number of loops on both sides of strip)

Knot end of yarn.

STITCH:

Step 1  
Put crochet hook thru center loop - chain 2 - then thru left front loop and do a bee hive stitch.  
Turn loom - Repeat above.

Step 2  
Turn loom - Put crochet hook thru center loop - chain 2 = then thru left front loop and Single Crochet 1.  
Turn loom - Repeat above

Continue with Step 1 and then Step 2 to end of strip.  
Let center strands dangle to be used for tying on beads.

JOINING STRIPS

Make the longest center the first and then the second longest. To join - start at the knotted end of the longest strip. Twist 1st loop put crochet hook in and (count 1) Take up next loop and pull thru 1st loop (count 2) take up next loop and pull thru loop on hook (count 3). Now, at knotted end of strip of 90 loops - twist 1st loop - put on crochet hook and pull thru loop on hook. Pick up next loop Take up next loop on second strip and pull thru loop on hook. Continue this way to end.

BEE HIVE STITCH:Put crochet hook thru left front loop - yarn over - Pull thru to front - yarn over - then thru left front loop - yarn over - pull thru to front - yarn over - (5 loops on hook) Pull last loop thru other 4 loops on hook. Hold the stitches with left hand and pull up center loop to tighten. You will have to work loose enough to do this stitch easily.

Attach all strips in this same way using the chart as a guide.

When all strips are attached, at top of shawl work or weave ends into center of strip with a crochet hook. Cut off excess yarn. Finish lower shawl ends by placing a bead on a steel crochet hook (#8, 9 or 10) and pull dangling ends of yarn thru bead. Tie with 2 knots under bead - pull tight - cut ends.
Finishing Touches on Hairpin Lace Shawl

The finished Hairpin Lace Shawl.

On the center strip attach 2 strands of yarn (12 inches long) as you attach fringe. Put on beads at random. Double knot the ends tightly and let dangle.

TO ATTACH FRINGE: ½ inch from end of the strip - pull center of strands down with crochet hook making a loop. Pull ends of strands thru the loop and tighten.

The top of the shawl is finished off with a Hairpin Lace braid with fringe.

BRAID WITH FRINGE:
Use 4 strands at once (2 green yarn and 2 gold) to be used as 1 strand. Use a 3 inch loom and the Slip Stitch with an "H" crochet hook. Make 310 loops (155 each side of strip). Stretch out braid so it covers the entire top of shawl. Start at the right end using the top loops only. (The bottom loops will hang down as fringe). About ½ inch from top edge of shawl push crochet hook up from bottom through the material and pull 1st loop down through the material. Bring loop up to catch the next loop on the braid. Pull thru 1st loop on hook. About ½ inch over bring crochet hook up from the bottom - pull thru next loop of braid - pull thru loop on hook. Then pull next loop on hook. Continue this way to end.

TO FINISH ENDS OF SHAWL:
Cut 3 strands 30 inches long and attach as you would attach fringe. Put on beads at random - knot ends and let dangle. Do this to both ends.

HAIR ORNAMENT: (You will need about 50 extra beads for this). On a 3 inch loom put another rod at 1 inch. Work in large space using the same stitches as you used in the shawl. Use 1 strand (1 green and 1 gold) and make 25 loops. Before removing strand from loom, slip a piece of yarn down thru the shorter loops. Carefully remove from loom and tie the ends of the yarn forming a circle. Put beads on outer loops - (1 bead on each two of the loops). Put crochet hook thru 2 loops pulling 1 thru the other one. Then place another bead on loop on crochet hook. Put crochet hook thru beaded loop and draw next loop thru one on hook. Put a bead on loop on hook. Continue to end of circle. Draw the closest dangling end thru last loop. Draw all dangling ends thru center of circle and make cascading jewels by placing beads at random on the ends as pictured. Tie a knot under each bead as it is put on. Crochet some knobs on back of ornament for attaching to hair.
