Student Position Title: Drupal Web Developer + IT Support
Eligibility: Undergraduate/Graduate
Application Review Begins: October 16th, 2015

Position Summary:
The Institute of the Environment seeks a self-motivated, mature, highly responsible student to perform the duties of Drupal Web Developer and also provide general IT support. Student must be available for at least 10 - 20 hours per week.

Job Duties:
Contribute to and support defined assignments under the direction and supervision of Web Designer/Developer staff and the Manager of Development and Information Technology. Student will contribute to simultaneous projects while maintaining attention to detail and work collaboratively to maintain, develop, and edit new and existing websites within the Drupal Content Management System. Other technical support duties may be assigned to assist users with general IT issues.

Required Skills and Experience:
Experience with Drupal 7.
Proficient with XHTML, CSS and standards based web development.
Strong communication skills.
Ability to multitask while maintaining attention to detail.
General IT and Operating System knowledge (Windows 7 and OS X).

Desired Experience:
Experience with responsive design within Drupal.
Experience with JavaScript or other scripting languages.
Experience with PHP 5 and MySQL.
Experience with Adobe Creative Suite Applications (Photoshop, InDesign, etc.).
Experience with general IT support (Software installation/usage and hardware troubleshooting).
Experience with computer and A/V setup.

Application Process:
Send your resume, cover letter, and school schedule to Rey Granillo at reyg@email.arizona.edu. You can also apply through UA JobLink by searching for Job ID 778273.
