cmdR Consulting

Job brief
Do you like writing mean and clean Ruby code? Come join our team and help us build amazing things.

We’re looking for someone with a passion for programming and for writing beautiful code. You will join a team of exceptional developers working in a fast-paced environment to deliver world-class software.

Responsibilities

- Write clean, maintainable, and efficient code
- Design robust, scalable, and secure features
- Contribute in all phases of the development lifecycle
- Follow best practices (test-driven development, continuous integration, SCRUM, refactoring, code standards)
- Drive continuous adoption and integration of relevant new technologies into design

Requirements

- BS/MS degree in Computer Science, Engineering or a related subject
- Proven working experience in developing applications with Ruby on Rails
- Proven working experience in software development
- Demonstrable knowledge of front-end technologies such as JavaScript, HTML, CSS & JQuery
- Experience developing highly interactive applications
- A firm grasp of object oriented analysis and design
- Passion for writing great, simple, clean, efficient code
- Good knowledge of relational databases
- Working knowledge of NoSQL databases
