13) What did you especially like about this course?

Response Text	Frequency	Response Percent
All good	1	7.69%
Alon is an Angel. He is always willing to answer questions about a homework in class before a lecture and is just a really genuine person. Both of which I really appreciate and helped me become engaged in the course despite my initial struggles.	1	7.69%
Enjoyed the algorithms, they were pretty cool	1	7.69%
Good examples, lots of practice opportunities	1	7.69%
I liked the deep dive into algorithms and how to take a certain geometric question and determine what efficient algorithm to use. I would say the course accomplished its purpose.	1	7.69%
I think the teacher is nice and respectful.	1	7.69%
Interesting subject matter.	1	7.69%
It was an interesting topic	1	7.69%
NA	1	7.69%
The flexibility of the course.	1	7.69%
The homework really reinforces what I've learned in the lectures. Professor knows the material extremely well, and is able to teaching it very clearly. Being able to watch the lecture remotely was great when I had to miss classes.	1	7.69%
the prof and the Ta were very nice	1	7.69%
No Response	1	7.69%

14) What suggestions would you make to improve this course?

Response Text	Frequency	Response Percent
A better, well communicated source for course information. I dislike Piazza, and I'd personally prefer a more central class website or something like that (preferably linked on D2L as well).	1	7.69%
Add examples and practice problems during lecture? maybe like one problem per topic. to help with the hw.	1	7.69%
At least show us the correct HW answer after due date.	1	7.69%
I would make it a little less theoretical. I would say maybe have some bigger implementations of some of the algorithms to see how they work on a larger scale.	1	7.69%
Maybe make the homeworks smaller and have more of them? 11 to 13 problems is a lot to do in 2 weeks. Quicker feedback would be appreciated.	1	7.69%
N/A	3	23.08%
NA	1	7.69%
Not as much lecture time and more inclass examples and such. He kind of goes through the material relatively fast and doesn't explain in too much detail. His lectures are somewhat boring.	1	7.69%
Some written out examples of the proofs as guides for the first homeworks.	1	7.69%
No Response	2	15.38%

15) Please write any additional comments you may have below.
