

QUIZ!

Quiz Stuff

Use a full sheet of 8½x11" paper. (Half sheet? Half credit!)

To avoid a one-point deduction, put your last name and NetID in the far upper left hand corner of the paper, where a staple would hit it. (It helps with our paper handling!) Like this:

Mitchell, whm

.....

No need to write out questions. Number responses if you'd like, but that's not required. Keep answers short to save time.

There are four 1-point questions and a ½-point extra credit question.

You'll have 2, repeat, 2 minutes on this quiz.

Last name, UA NetID,
here

Quiz 12, November 15, 2013
2 minutes; 4 points + ½ point E.C.

USE FULL 8½x11"
SHEET OF PAPER!

1. The fundamental characteristic of a relational database is that all data is represented in the form of _____. (one word, ideally)
2. What's the SQL statement that's used to query data? (one word)
3. What's the three-letter abbreviation for the PHP data access library we'll be using?
4. Using the library mentioned in the previous question, after calling the **query()** method the **fetchAll()** method can be used to return all the data produced by the query. Very briefly, how is that data represented in PHP?

Extra credit (½ point):

Who invented the relational model?

(or) Who wrote the "deep" book on the relational model that whm mentioned?
