# QUIZ REVIEW!

Quiz Stuff

Use a full sheet of 8½x11" paper. (Half sheet? Half credit!)

To avoid a one-point deduction, put your last name and NetID in the far upper left hand corner of the paper, **where a staple would hit it.** (It helps with our paper handling!) Like this:

*Mitchell, whm*

....................................................................

No need to write out questions. Number responses if you'd like, but that's not required. Keep answers short to save time.

Each question is worth ½ point; 4½ points total, and ½ point of extra credit.

You'll have 3 minutes on this quiz.

1. Cite **three** search engine shortcuts related to 337 that you've established on your primary machine, whatever that is. Name each shortcut and what it brings up. An example for whm: *a0: shows a0 spreadsheet*

   **Note: Be honest! Three students with laptops will be asked for a demo!**

2. Write an example of each of these CSS selectors:
   (1) child
   (2) class
   (3) descendant
   (4) type
   Show each selector with an empty declaration block: **... { }**

3. What will be turned red by the following CSS rule? **li li { color: red}**

4. Fill in: Most inherited properties relate to the appearance of _____.

EC (½ point): Who discovered that this classroom was available for us?
