QUIZ REVIEW!

Quiz Stuff

Use a full sheet of 8½x11" paper. (Half sheet? Half credit!)

To avoid a one-point deduction, put your last name and NetID in the far upper left hand corner of the paper, **where a staple would hit it.** (It helps with our paper handling!) Like this:

Mitchell, whm

....

No need to write out questions. Number responses if you'd like, but that's not required. Keep answers short to save time.

All answers are ½ point each. There's ½ point of extra credit.

You'll have 3 minutes on this quiz.

1. What's the **php** command-line option to start interactive mode?

2. Write PHP code to (1) assign the value 7 to some variable and (2) print the value of that variable.

3. What's the type of the result of evaluating the expression **1/3**?

4. What's the name of the PHP function that returns the type of its argument?

5. Is **error_reporting()** a function or a method?

6. What's the official website for PHP?

7. Given **$s = "abc"**, what is the type of **$s[100]**?

EC (½ point): whm is now learning his 24th and 25th programming languages. Name one of them.
