Cs352 — Homework #10
OpenGL

April 27, 2004

Due Time: 5/5/04 (11:00PM). Submission in pairs is **NOT** allowed.

Turnin ID: cs352_assg10

Write an OpenGL program that displays the current time in decimal digits (e,g, 12:33:01). Do not use any method for displaying digits — implement the digits using the "standard" 8-shape yourself. The window should be refresh every 2 seconds. You can choose the backup colors, shapes, and any other relevant parameter according to your personal taste.
