CSc 451, Spring 2003
Assignment 1
Due: Tuesday, May 6 at 18:00

Problem 1. (10 points) `changes.txt`

Cite ten changes that you think should be made in Icon or Unicon. For each change provide a sentence or two of rationale.

Example:[1]

```
(1) Subscripting for strings and lists should be 0-based,
not 1-based.  Most languages in widespread use employ 0-
based subscripting and Icon's 1-based approach simply
invites bugs.
```

Use `turnin` with `451_1` to submit your solution for grading. The deliverable for this assignment is `changes.txt`, an ASCII text file.

---

[1] No, you can't use this as one of your ten changes.
