TEXTILE MERCURY.

BERLIN.

Amid a few large articles in rolls, the wool market is still very quiet, and neither buyers nor sellers in worsted are busier than usual.

The fall, however, regarded as merely temporary, and a small tone prevalence, especially those concerned with German wool. The increased demand for the latter two articles, and the prospect of a steady trade in scissors, is a very important feature, which will in many cases be expected with great advantage by the wool trade.

The next three months will be of great importance, especially those months when the demand is expected to be very heavy. The present market is composed of small quantities, which are being sold at a very rapid rate.

The export demand is very large, and the market is very active.

CHEMISTRY.

Many important changes have taken place in the wool market, and the demand for wool is increasing daily. The present market is a very active one, and the demand for wool is increasing daily.

The export demand is very large, and the market is very active.

TEXIES.

Although business is not quite recovered from the previous season, the demand for yarn is increasing daily. The present market is a very active one, and the demand for wool is increasing daily.

The export demand is very large, and the market is very active.

FANCY DRESS STRIPES IN COTTON.

The cloth market of Longsword, formerly belonging to Muller, in Schwerin, was completely destroyed by fire.

The cloth market of Longsword, formerly belonging to Muller, in Schwerin, was completely destroyed by fire.
Design 26 is suitable for either silk warp, or cotton dress goods. As a warp, the following set is suitable:—

Warp, 20's worsted. 100 ends per inch.
Wet, 50's worsted. 100 picks per inch.

The direction of the warp and weft yarns are given in the diagram, and the yarns are to be wound on the loom accordingly. If the design is to be reversed, the yarns are to be re-wound in the reverse order. The selvage yarns are to be wound on the left side of the loom, and the rest of the yarns on the right side. The warp and weft yarns are to be wound on the loom in the order given in the diagram.
