MANCHESTER.

Whitallite is in demand in a generally cheerful

feel and an amount of buying activity in

most of the large wholesale houses, which

may be due to the fact that one is the

day. The heavy departments are not doing much, and in

some quarters complaints are heard about the trade in

general. On the whole, however, there is not much

to grumble at. Payments are collected with more

difficulty, and this one is the most

discouraging features at the present time.

Even

now, like as it is, orders from travellers and by

letter are fairly numerous, so that there is

reason to be busily employed. Caldbeck's stock, which

was due to be sold by private sale, according to

reports recently current, does not yet appear to have

changed hands, and it is understood that the

house is quietly letting it run down. Had

it not been for the intervention of the Whitallite
