FROM THE EDITOR

Our program for the coming year 1955 is as follows:

We shall continue our Lessons of Drafting with: short drafts, variations of patterns, and analysis.

We start a new serial: yarns, their count, sources, properties, and applications.

In theory of weaving we shall discuss pile weaves, cross weaves (gauze, leno, pickets, riddles), and net weaves - besides the more common techniques.

We shall continue with articles of general interest such as: sett of warp for heavy yarns, mixed warps, doubling the weft, etc.

From now on "Master Weaver" will be sent in envelopes, not folded.
