CONTENTS.

INTRODUCTION ........................................... 1
COUNTS OF YARNS ........................................ 5
Worsted Yarns .......................................... 5
Cotton Yarns ........................................... 6
Spun Silks ............................................. 7
Raw Silks ............................................... 8
Linseed Yarn .......................................... 9
Woolen Yarns ......................................... 9
To Reduce the Counts of Yarn in one system to its equivalent counts in another system .......... 17
Ascertaining the Counts of "Folded" Yarns, whether yarn consists of one material or more .......... 19
Twisting Different Materials .......................... 23
To find the Counts of a Yarn when three or more threads are twisted together ....................... 26
To find the Count of a Thread, which twisted with any known thread will produce one of a given count, in twisting together two threads of Different Counts, to find the weight of each required to produce a given weight ........................................ 29
To find the Average Counts, when any number of yarns of different counts are used in the same cloth .................................................. 30
The cost of "Folded" Yarns ............................ 33
To find the Cost of Mixed Yarns ...................... 38
Relative Diameters of Threads ....................... 44
The Twist of Yarns .................................... 47
SETT CALCULATIONS ...................................... 49
To find the Ends per Inch, or in any number of inches, in any Sett System .......................... 53
When Ends, &c., are given to find the Sett ....... 57

CONTENTS

When each Split in the Reed does not contain the same number of Ends, to find the ends in a given width of piece ..... 97
When each Split in the Reed does not contain the same number of Ends, to find the average number per inch, or the average Sett ..... 99
The calculations for striped and checked patterns ..... 103
To find the Cost of Fabrics ..... 107
To find the price per lb. of Scoured Wool, the price in the grease being known ..... 107
The Structure of Fabrics ..... 113
What constitutes a perfect cloth? and what is meant by the "balance of cloth," or cloth structure? ..... 114
Plain Cloth ..... 114
Altering the Character of Plain Cloths ..... 117
Twilled Cloths ..... 119
To alter the Pattern and retain the same perfection of structure ..... 121
In changing from one Pattern to another, to find the number of Ends or Picks per inch, to produce a cloth of the same character ..... 122
Satin Cloths ..... 122
Figured Cloths ..... 124
Double Cloths ..... 124
The alteration of the relative quantities of Warp and Weft, and retaining the balance of structure ..... 128
The diameters of Threads of different counts ..... 133
Table showing the relative diameters of Cotton Yarns from 200's to 1's ..... 135
Table showing the relative diameters of Worsted Yarns from 120's to 1's ..... 136
Table showing the relative diameters of Woollen Yarns from 60's to 1's—Yorkshire Skein Count ..... 140
Table showing the relative diameters of Woollen Yarns from 60's to 1's—West of England Count ..... 141
Table showing the relative diameters of Woollen Yarns from 60's to 1's—Galashiels Counts ..... 142
Table showing the relative diameters of Linen Yarns from 200's to 1's ..... 143
The relative diameters of Yarns of different materials ..... 145
The influence of Twist upon the diameter of a Thread ..... 148
The diameter of one Count of Yarn being given to find the diameter of any other count of similar yarn, or in any system of counting ..... 149
XII.

CONTENTS.

The diameter of one Count of Yarn being given to find Ends or Picks per inch of that or any other counts of similar yarn, to make a perfect cloth in any pattern .......... 157
Modifying Influences .......... 160
Fabrics of the same Structure but Different Weights .......... 161
Having a Cloths of given weight, to find the counts of yarn, ends and picks per inch, to produce a cloth of any other weight and equal in structure ........ 163
Having a Cloths of given weight, to find the counts of yarn, ends and picks per inch, to produce a cloth of any other pattern and weight, and equal in structure .......... 168
Having a Cloths of given weight to find the counts of yarn, ends and picks per inch, to produce a cloth of any other weight, and to alter the character of the cloth, and be equally perfect in structure .......... 171
To change from one Count to another Count and to find Sett or Picks to retain the same character of Cloth .......... 172
To change from one Sett or Picks per inch, with a given count of yarn, to another sett or picks per inch, and find what counts of yarn will be required .... 173
To find what Counts of one Material may be substi-
tuted for another material of given counts—as woollen for worsted, worsted for cotton, &c.—to produce a similar cloth, when the sett or picks of the two fabrics is known .......... 174
To find what Sett or Picks per inch will be required to produce a cloth of one material similar to a given cloth of another material, the counts in each case being known .......... 176
To alter Cloths in weight only .......... 178
To alter Cloths in Fineness or Coarseness only .......... 178
To alter Cloths in respect to both Fineness and Weight .......... 179
Summary .......... 181
Appendix A .......... 182
Appendix B .......... 216
