D·M·C LIBRARY

In order to encourage and develop the taste for needlework of all kinds and to make the use of the numerous articles specially manufactured by them for sewing and embroidery more widely known the Société Anonyme Doffus-Mieg & Cie, have issued a series of publications forming a complete library in itself, which treats with every form and description of needlework.

Each album consists of a series of unpublished and very varied patterns, accompanied by an explanatory text with the assistance of which it will be found easy to execute even the most complicated designs.

Although in artistic value, in the selection of the patterns and the care expended on the execution, these publications surpass every thing till now produced of the kind, they are offered at a price greatly below their value; that they could be produced under such favorable conditions is due solely to the size of the editions and the object in view.

All needlework publications are edited in French and German, and some in English. As the text however is but of secondary importance while the designs are the principal feature, all these works can be used to great advantage even in the countries where other languages are spoken than those in which they are edited.

Further on will be found a list of these publications, which are to be had of all booksellers, mercers and embroidery shops, or if necessary direct from the publisher Th. de Dillmont, Mulhouse (Alsace).
