AN ESSAY

On the Practicability and Profitableness of Manufacturing the Cotton Crop of the South Within Our Own Limits.

To present facts in a statistic, an argument is required to make them cogent. We observe that the annual output of the cotton crop of the South is enormous, and equal to the annual output of all the cotton-growing countries of the world. The total value of the cotton crop of the South is about $1,000,000,000. The total value of the cotton crop of the United States is about $2,000,000,000. The total value of the cotton crop of the world is about $3,000,000,000. The total value of the cotton crop of the Southern States is about $5,000,000,000. The total value of the cotton crop of the United States is about $7,000,000,000. The total value of the cotton crop of the world is about $9,000,000,000.

But from the statistical history of the cotton crop of the South, it appears that the crop has increased in value from $1,000,000,000 to $5,000,000,000, and is expected to increase in value to $7,000,000,000. The total value of the cotton crop of the world is expected to increase in value from $3,000,000,000 to $9,000,000,000.

The cotton crop of the South is a valuable commodity, and is of great importance to the people of the South. It is an important source of wealth, and is an important source of employment.
