

DOMESTIC ROVING AND
SPINNING MACHINE.

THIS very important and useful invention for Roving and Spinning Cotton and Wool, has been secured to the subscribers by Letters Patent. As it is impossible to give an adequate idea of machinery by description, it may be sufficient to state, that the Machine is very simple in its construction and operations, and not more liable to be put out of repair than a common spinning wheel, and may be repaired by any ordinary mechanic. It will occupy about the same room as a bed; a child may learn in a short time to spin from 24 to 36 skeins in a day, with a machine of twelve spindles; the spindles may, however, be increased to any desired number. The yarn may be spun to any required size, and that size preserved with great exactness. If a person wishes to ascertain the profits of a Machine of 12 spindles, he may calculate

Spinning, in the usual way, 300 skeins at 5 cents,	Dolls. 15 - 00
With the Machine, this will require 10 days labor at 2s.	3 - 33
	11 - 67
Balance in favor of the Machine	Dolls. 11 - 67

The Subscribers have received from the Patentee an assignment of "the full and exclusive right of making, using and vending to others the use of" the above Machine in the District of Maine and State of Massachusetts.

Persons wishing to purchase may see a Machine and learn the terms, by application to the Subscribers at No. 1, Mussey's Row, Portland. Letters must be *post paid*, or they will not be attended to. All persons are cautioned against using the said Machine within the above District, as we will prosecute every offender with the utmost rigor of the law. A generous reward will be given to any person who will give us information of trespassers upon the Patent, so that a conviction may be had.

JOSHUA SHAW,
 STETSON LOBDELL.

N. B.—The price of the above Machine is 50 dollars complete, or 20 dollars for the Patent Right of one. Any person wishing to purchase the Right for a County, Town, or a Single Right, will please to apply as above.
