Vol XXV No 3

The wool sample is of Fabri set at 24 ends per inch and woven at about 15 per inch, with a metallic weft on the a tabby shed. The warp was set at 24 to give a firm tabby fabric for a suit. A stole to match was under-woven in this manner for its soft, draping quality. The stole was woven in all lace, using only the tie-down and tabby sheds.

This sample is of 24/2 cotton set at 36 ends per inch. It illustrates the use of novelty materials on tie-down shed only to bring out the nature of the weft. The pattern border is in the weft-pattern weave with alternating tabbys, and illustrates how blocks may be woven alone or combined in the tie-up with other blocks. The pattern weft is Lily Article 714, 10/3 mercerized cotton.
